BreathRx tongue spray

Kills bad-breath bacteria

Replacement tongue spray for Philips Sonicare TongueCare+. Used together with our TongueCare+ tongue brush, the unique formula kills bad-breath bacteria and neutralises odours for lasting fresh breath.

A powerful combination of ingredients

- Kills bad-breath bacteria
- Specially formulated to keep breath fresh

Our most advanced breath-freshening solution yet

- Fresh breath without the drying sting of alcohol
- Clinically proven results
- Coats the tongue for a complete and comfortable clean

Highlights

Fresh breath confidence

The Philips Sonicare BreathRx tongue spray is clinically proven to kill bad breath bacteria and neutralise odours instantly. The special thick formula coats the tongue to deliver bacteria-killing ingredients where they're needed most. The cool mint flavour leaves your mouth feeling fresh and clean.

Powerful ingredients

The unique and powerful combination of ingredients in our Philips Sonicare BreathRx tongue spray is what makes it so effective. Specially formulated with bacteria-killing CPC and Zytex—our exclusive blend of zinc, thymol and eucalyptus essential oils that neutralise unwanted odours—the spray delivers instantly fresher breath and keeps working over time.

Alcohol-free

Tongue sprays and mouth rinses with alcohol can dry out the mouth, and a dry mouth is the perfect environment for bad breath bacteria to

thrive. Our alcohol-free BreathRx tongue spray leaves your mouth feeling hydrated, and your breath fresh.

Thick formula

Philips Sonicare BreathRx tongue spray works hard to keep your breath fresher, for longer. Unlike regular mouthwash, our special thick formula coats your tongue to ensure that all the bacteria-killing ingredients have ample time to take effect, and keeps it lubricated while the TongueCare+ tongue brush cleans away debris and bacteria.

BreathRx tongue spray

The unique combination of ingredients in our Philips Sonicare BreathRx tongue spray is clinically proven to kill bad breath bacteria and neutralise odours instantly. The special thick formula coats the tongue and keeps it lubricated for a gentle cleaning experience. The cool mint flavour leaves your mouth feeling fresh and clean.
