Specifications

Technical specifications

- Operating time: Replace nozzle every 6 months

Highlights

Guidance tip

Simply glide the guidance tip along the gum-line until you feel it settle between the teeth. Provides easy positioning even on those hard-to-reach back teeth.

Printed droplets on nozzle

In each pack of 2 nozzles, one nozzle is printed with a solid droplet and the other with a clear droplet. This makes it easy to identify nozzles when sharing the device between two people.

Slim, angled nozzle

Slim, angled nozzle makes it easy to clean even the hard-to-reach areas

Up to 99.9% Plaque Removal

AirFloss uses microdroplets of air and water or mouthwash to remove up to 99% more plaque between teeth*
