Less hair damage

- EHD+ technology for more protection and shinier results

Time saving

- Instant heat: ready to use within 30 seconds

Highlights

Ceramic Nano-Silver plates

Ceramic Nano-Silver plates for gentle styling & shiny finish

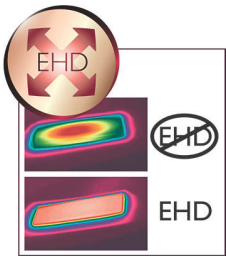

200°C professional temperature

This high temperature enables you change the shape of your hair, and gives you that perfect look like you've just come from the salon.

Adjustable heat settings

Adjustable heat settings allow you to quickly and easily change the styling temperature from low to high. This enables you to select the perfect temperature for your specific hair and needs so you can always get the smooth, styling result you want.

EHD+ technology

Advanced Philips EHD+ technology means that your styler will always distribute the heat very evenly - even at high temperatures, and

prevents damaging hot spots. This gives added protection and thus helps to keep your hair healthy and shiny.

Instant heat

Now more waiting around for your styler to heat up, this allows you to switch on and get styling.
