- 9 mm concentrator for focused airflow, great for styling
- Cool Shot sets your style

Fast drying experience

- 2100W of fast, high performance drying power
- Fast drying, powerful AC motor

Highlights

Powerful AC motor

Philips Pro hairdryer has a high performance AC motor developed for the professional market. It generates up to 130 km/h* of air speed for fast and effective results.

2100W of power

This 2100W Pro hairdryer creates a powerful airflow. The resulting combination of power and speed makes your drying and styling experience quicker and easier.

ThermoProtect temperature

The ThermoProtect temperature setting provides the optimal drying temperature and gives additional protection from overheating the hair. With the same powerful airflow, you will get the best results in a caring way.

Ionic care

Charged negative ions eliminate static, condition the hair and smooth down the hair cuticles to intensify the hair's shine and glossiness. The result is hair that is smooth, shiny and frizz-free.

Cool Shot

A must-have professional function, the Cool Shot button provides an intense burst of cold air. It is used after styling to finish and set the style.

Accurate control

The speed and heat required can be easily adjusted to create the perfect style. Six different settings ensure optimal control for precise and tailored styling.

9 mm narrow concentrator

The 9 mm opening of the concentrator focuses the flow of air for precision styling on specific areas. The ideal attachment for brushing while drying and styling.
