Highlights

Professional 2300W

Professional 2300W for great styling results

6 flexible settings

6 flexible speed and temperature settings

Ion conditioning

Ion conditioning for shiny, frizz free hair

Ceramic element

The ceramic element is included to prevent overdrying. It issues infrared heat, which has a gentle warmth which helps dries your hair from within and protects it from overdrying, without compromising on speed and effectiveness.

Volume diffuser

The volume diffuser dries hair healthily, reduces frizz and increases volume by spreading the airflow across the hair. It adds lift and maximises volume, especially when used on the crown and root area, making it perfect for creating curls and bouncy styles

2.5m cord

The longer length results in improved flexibility and ease of handling, so you can use it anywhere you want.

Narrow concentrator

The concentrator works by focusing the flow of air through the opening onto specific areas. This results in precise styling and is great for touch ups or to finish a style.
