SalonStraight Sonic

The SalonStraight Sonic combines advanced sonic vibration technology with Nano Diamond Ceramic plates and a professional temperature of 220°C for 30% faster straightening and super smooth results.

Ease of use

- Swivel cord to prevent tangled wires
- Automatic shut-off after 60 min
- Ready to use indicator
- Easy storage hook for convenient storage
- 1.8 m power cord

Beautifully styled hair

- 220°C professional high heat for perfect salon results
- Digital heat settings to ensure super smooth results
- Ceramic Nano-Diamond plates for extra smooth gliding results

Less hair damage

- EHD+ technology for more protection and shinier results

Time saving

- Instant heat: ready to use within 15 seconds
- Sonic technology for better results in less time

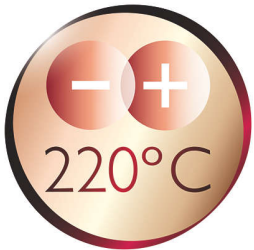

Highlights

Digital heat settings

Digital heat settings make it easy to quickly choose the function you need or adjust the styling temperature using the digital display. This enables you to select the perfect temperature for your specific hair and needs. The result is perfect styling at the touch of a button.

220°C professional temperature

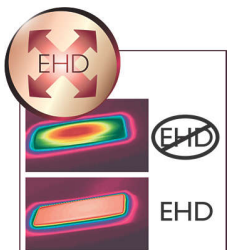

This high temperature enables you change the shape of your hair, and gives you that perfect look like you've just come from the salon.

Ceramic Nano-Diamond plates

Besides being a girl's best friend, diamonds are also physically known as the hardest surface possible. This knowledge has been used to optimize our Ceramic straightening plates. These advanced Ceramic Nano-Diamond straightening plates offer optimal heat transfer and a super smooth, scratch resistant surface for extra smooth gliding and beautiful shiny results.

EHD+ technology

Advanced Philips EHD+ technology means that your styler will always distribute the heat very evenly - even at high temperatures, and

prevents damaging hot spots. This gives added protection and thus helps to keep your hair healthy and shiny.

Sonic technology

Sonic technology is an exciting development in hair straightening. Gentle sonic vibrations help to spread the hair more evenly across the plates, resulting in 30% faster straightening. In addition, sonic technology also creates optimal heat transfer across the plates ensuring professional, beautifully smooth results.

Instant heat

Now more waiting around for your styler to heat up, this allows you to switch on and get styling.

Easy storage hook

The rubberised hook is located at the base of the handle and provides another storage option, particularly convenient for use in the home or when staying at a hotel.

Swivel cord

Useful swivel cord technology rotates the cord to prevent tangled wires.

Ready to use indicator

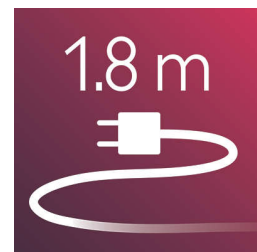

This shows when the styler has reached the right temperature, so you can instantly see when you're ready to style.

Safe usage

Some hair straighteners and curling irons have been equipped with an automatic shut-off feature. This feature has been designed to provide peace of mind. If left on, the appliance will automatically switch off after 60 min.
