- Powerful 1400W motor for smoother blends

Smooth blending under vacuum

- Manual mode with variable speed
- Preset program for vacuum and smoothie blending
- Strong Tritan jar
- Vacuum technology

PHILIPS

Highlights

Vacuum technology

Vacuum technology sucks the oxygen out of the jar before blending. Results are visible in the final blend: less bubbles, less foam, less juice separation. The smoothie stays fresh for longer.

Program setting

Choose out of 3 programs: vacuum smoothie, pulse, ice crushing. Be able to make any smoothie you like.

Strong Tritan jar

The Tritan jar is made out of copolyester and lighter than a glass jar. It does not smell or stain. The ideal environment for your favorite smoothie.

Choose your blending speed

From gentle blending for soft fruits - to a burst of power for harder fruit and vegetables. It's up to you with our variable manual speed options.

More power for smoother blends

Finer blending of fruits and vegetables, thanks to our 1400W motor.

Unlocks more nutrients

We developed our ProBlend 6 3D technology to ensure that all of the ingredients in your smoothie are finely blended – so the nutrients in fruit, vegetables and nuts are unlocked from the cell structure and easily absorbed by your body.

Up to 35000 RPM

35000 RPM for excellent blending and even healthier smoothies

Dishwasher safe, easy to clean

All detachable parts of your Philips blender are dishwasher safe - except for the blade unit, which can be easily rinsed clean. The base can be wiped clean if needed.

Detachable blender blades

To clean the blender blades, simply detach them from the blender jar and rinse. However, the blades cannot be cleaned in the dishwasher, to preserve their sharpness.

Specifications

Country of origin

- Made in: China

Technical specifications

- Cord length: 1 m
- Power: 1400 W
- Capacity jar: 2.2 L
- Working capacity jar: 1.8 L
- RPM blender (max): 35000 r/min
