Highlights

Powerful and quiet motor

The Marathon's powerful 2000 Watt motor generates very high max. suction power in its category. Its efficient design also makes it exceptionally quiet.

Lasting suction power

Thanks to its Cyclone Filter technology, the Marathon maintains a high level of suction power over time, whereas average vacuum cleaners lose suction power quickly as their dust bag or filter becomes clogged.

HEPA AirSeal, HEPA 13 filter

This Philips vacuum cleaner has been designed in such a way that all the air taken in is passed through the washable HEPA 13 filter (99.95% filtration) before it is exhausted. No escape is possible.

TriActive nozzle

The TriActive nozzle cleans your floor in 3 ways in one go: 1) A larger opening at the tip of the nozzle easily sucks up big bits. 2) It has maximum cleaning efficiency due to optimised airflow through the nozzle. 3) The two side brushes sweep up the dust and dirt closely alongside furniture and walls.
