Professional volume and curls

SalonCurl Pro

The SalonCurl Pro is a truly professional curler that helps create long-lasting volume and curls quickly and effectively. It also gives your hair maximum protection thanks to the ceramic coating and even heat distribution element.

Protective ceramic coating

- Ceramic coating gives non-stick and even heat

Set your ideal temperature digitally

- 9 digitally adjustable heat settings for each type of curl

Swivel cord for hassle free use

- Swivel cord prevents the cord from tangling

Voluminous curls from 32 mm barrel

- To create big curls and to add volume to your style

Heats up in just 30 seconds

- Heats up to 100°C in just 30 seconds

Highlights

Digital settings and display

There are 9 heat settings, which are adjustable between 100°C and 180°C to accommodate all hair types and both firm and loose curls.

Protective ceramic coating

Ceramic coating has non-stick properties on your hair and distributes the heat evenly.

32 mm barrel

to create big curls and to add volume to your style.

Quick heat-up time

Heats up to 100°C in just 30 seconds, to get you started quickly.

Swivel cord

Useful swivel cord technology rotates the cord to prevent tangled wires.

Ready light indicator

Color of light changes to green when the set temperature has been reached.
