Squeeze every drop from your fruits and vegetables

- 2 speeds for soft or hard fruit and vegetables
- Make up to 2.5 liters of juice in one go
- No pre-cutting needed thanks to XXL feeding tube
- Juice the toughest ingredients - 1000 W
- Extract 10% more juice

PHILIPS

Highlights

10% more juice

Thanks to the innovative juice extraction system with upside down sieve, the juicer squeezes every drop of your fruits and vegetables, creating a juice fountain. You get up to 10% more juice, compared to Philips' number one juicer HR1861.

Make 2.5 L in one go

Thanks to the innovative juice extraction system with the upside down sieve, this juicer extracts up to 10% more juice*. And depending on the type of fruit or vegetables one juices, it is possible to make up to 2.5 liters of juice in one go without the need to empty the pulp container.

XXL feeding tube

The 80 mm extra large feeding tube allows you to juice even large fruits and vegetables like apples, carrots and beetroots without pre-cutting.

2 speeds

The 2 speeds of the Philips Juicer allow you to extract the most out of your favourite fruit and vegetables - both soft and hard.

QuickClean technology

The Philips juicer is designed for easy cleaning thanks to QuickClean technology. Cleaning is now as simple as rinsing, thanks to the pre-clean function and the QuickClean polished sieve.

Pre-clean function

The Philips juicer is the 1st centrifugal juicer on the market with a pre-clean function. By pouring water in the pusher, you can create a water fountain in the appliance, which rinses away the unwanted fibers from the lid and makes the sieve easier to clean.

QuickClean polished sieve

A lot of pulp fibers get stuck in a standard sieve which makes it very difficult to clean. That is not the case for the QuickClean polished sieve of the Philips Juicer, as all surfaces of the sieve are smooth. After pre-cleaning, you can easily swipe away the remaining fibers with a standard kitchen brush. The complete juicer can now be cleaned within a minute!

Integrated pulp container

The pulp will all be collected in the only place where it should be: in the pulp container of your Philips juicer. That means there is no need to remove pulp from other parts such as the lid anymore. Due to the round design and smooth surfaces without nooks and crannies,

the pulp is easy to reach and the container is much easier to clean.

Dishwasher-safe

All removable parts can be cleaned in the dishwasher.

Quick and easy assembly

Quick and easy assembly of all parts.

Drip stop spout

When activated, the drip stop will prevent the juicer from dripping. The drip stop spout is very easy to clean as it is detachable and it is made of dishwasher safe materials. With one simple move, you prevent the juice from dripping and keep your counter top clean.

Specifications

Accessories

- Included: Spout

Technical specifications

- Voltage: 110 V
- Power: 1000 W
- Capacity jar: 2.5 L

Design

- Color: Black & Metallic
