Cup warmer

Technical data

- Power: 1400 W
- Boiler: Stainless steel
- Voltage: 230 V
- Pump Pressure: 15 bar
- Frequency: 50 Hz

Highlights

Removable brewing group

The brewing group, a Saeco invention, is the heart of our espresso machines, ensuring automation. The brewing group is, depending on the model, easily accessible from the front or side. It can be removed effortlessly for easy cleaning by rinsing under the tap, ensuring maximum hygiene.

Auto-cleaning and descaling

Saeco designed this espresso machine to automatically clean its coffee circuit with water when starting up or switching off to deliver a great, fresh taste with each cup of coffee. Regular descaling prolongs your espresso machine's life. This machine will not only prompt when descaling is needed, the automated descaling process will start and guide you with clear on-screen messages when you have to intervene. Descaling has never been so easy!

Crema and body boost

This Saeco features our patented crema and body boost. This dial, conveniently located at your machine's spout, allows you to smoothly adjust the counter pressure, changing your espresso's body and crema. Try it yourself and find your favourite taste.
