Grind your favorite coffee beans

- Bean to cup system

Easy to use

- Cup warmer
- Ergonomic in day-by-day operations

 **Saeco**

Highlights

5 step adjustable grinders

Different coffee blends require different levels of granularity for the full flavor to unfold. The grind granularity of this espresso machine can be adjusted in 5 settings, from the finest grind, for a full bodied espresso, to the coarsest, for a lighter coffee.

Coffee customization

With Saeco full automatic machines, you can customize your espresso as you like it: from a strong short espresso to a mild long coffee

SBS (Saeco Brewing System)

Saeco automatic espresso machine exclusively allows you to adjust your espresso's intensity, altering the crema and body structure as it is dispensed. Simply by turning the knob you can prepare the crema exactly according to your taste. A little knob that makes a big difference.

Bean to cup system

It means that whole coffee beans are freshly ground and directly processed for each and every beverage.

Cup warmer

This feature allows you to not only store your espresso cups and glasses right on the espresso machine, it also pre-heats them letting the aroma unfold even better and guaranteeing a long-lasting crema

Classic milk frother

This Saeco espresso machine comes with the classic milk frother that baristas call a "Pannarello". It dispenses steam and is immersed in milk to prepare gorgeous milk foam. Unleash your inner barista by preparing your delicious milk specialties the traditional way!
