Enjoy your coffees every day with no hassle

- Designed to maximize capacities in a compact footprint
- Easily operate your machine via the intuitive display
- Easy cleaning thanks to fully removable brew group
- Enjoy a great coffee with Auto-Rinse & guided descaling

PHILIPS

Highlights

100% ceramic grinders

Our grinders are 100% pure ceramic: extremely hard and precise, so you can enjoy fresh aromatic coffee, for at least 20.000 cups.

3 aromatic coffees

Enjoy your favourite coffees for your special moments. Whether you crave for an espresso, a coffee or a milk based recipe, your fully-automatic espresso machine delivers a perfect in-cup result with no hassle and in no time!

Adjustable coffee spout

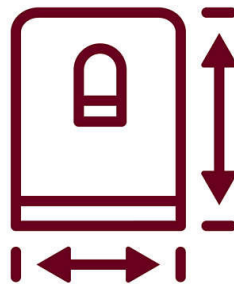

The adjustable spout on our espresso machines will fit every cup and thus prevents the coffee splashing or cooling down while pouring in your cup. This way your espresso is always served at the right temperature while maintaining a clean machine.

Classic milk frother

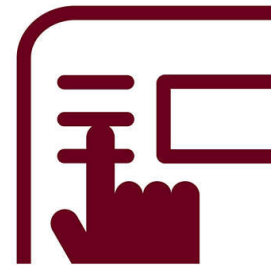

The Classic Milk Frother dispenses steam, allowing you to easily prepare silky smooth milk froth for your cappuccino. What's more? With only two parts, the Classic Milk Frother is also easy to clean.

High capacity & compact design

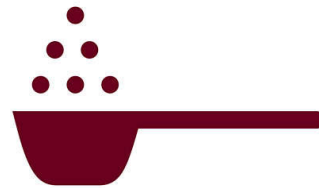

Enjoy more room and go longer without refill thanks to the high-capacity bean, water, and waste containers in a super-compact design. This smart, super-automatic machine provides you with maximum convenience and top notch performance thanks to a large capacity water tank, bean and waste container.

Intuitive Display

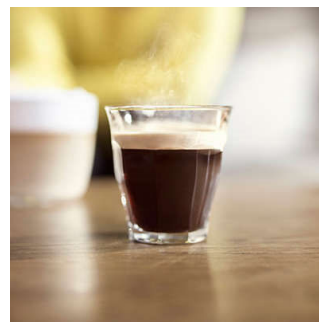

The intuitive display shows you all relevant information to easily interact with your machine and get the best performance. The icons will guide you through all customisation options and important maintenance activities.

Powder Option

Sometimes it's nice to have the option of a full-bodied, delicious coffee, without the caffeine kick. Thanks to the Powder Option you can make decaffeinated coffee whenever you please.

Thermoblock

The Thermoblock ensures a hot coffee and cappuccino for your family always at the perfect temperature. The secret is in its light aluminum and stainless steel body, which can reach hot temperatures, fast.
