Never miss a trouble spot, for a perfect smile

Up to 10 x more plaque removal and healthier gums*

FlexCare Platinum Connected takes the guesswork out of oral care. Sensors send your brushing data to the Sonicare app via Bluetooth® wireless technology, providing you with personalised coaching and feedback for the most complete clean possible.

Track your brushing with real-time guidance

- Alerts you when you're brushing too hard
- Teaches you to reduce your scrubbing
- Track and improve your coverage

Sonicare app delivers personalised feedback

- A second chance to clean the spots you miss with Touch Up
- Always know how effective your brush head is
- Start taking better care of any problem areas
- The coaching you need to refine your routine

Philips Sonicare's deepest, most complete clean

- A customised brushing experience
- Contours to teeth and gums for a deeper clean
- Designed to fit your lifestyle
- Dynamic cleaning action for better oral health
- Timer helps to encourage thorough brushing

Highlights

Location sensor

FlexCare Platinum Connected's location sensor shows where you're brushing too little for better coverage. If there are spots you consistently miss when you're brushing, the location sensor will bring them to your attention.

Pressure sensor

You might not notice if you're brushing too hard, but your FlexCare Platinum Connected will. If you apply too much pressure, the intuitive pressure sensor will make the toothbrush handle gently pulsate so you know exactly when to adopt a softer touch. In studies, 7 out of 10 aggressive brushers successfully reduced their brushing pressure thanks to the pressure sensor.

Scrubbing sensor

With an electric toothbrush you let the toothbrush do the work, rather than using a scrubbing motion. FlexCare Platinum Connected has a scrubbing sensor that helps guide you to reduce scrubbing for an optimised technique and a gentler clean.

Touch Up

If you happen to miss any spots during a brushing session, the Philips Sonicare app tracks your coverage and gives you the opportunity to go back for a second pass. Touch Up provides customised guidance based on your personal brushing data so you can immediately address any missed areas and achieve a more complete clean.

Personalised coaching

FlexCare Platinum Connected lets you set daily goals and track your progress. The Sonicare app maintains a running history of your brushing data, so you can easily review your performance. With personalised coaching, tips and alerts from the app, your brushing technique will improve over time. You can even share your progress report with your dental professional.

Focus areas

If your dental professional identifies specific spots in your mouth that need more attention because of plaque build-up, gum recession or another issue, FlexCare Platinum Connected can help you tackle those problem areas. You

can highlight these spots in your personalised mouth map within the Sonicare app to remind you to give them the extra care they need each time you brush.

Brush head performance monitor

Over months of normal use, brush heads gradually wear down and lose their stiffness. The Sonicare app includes a smart brush head performance monitor for tracking your brush head effectiveness based on your actual brushing time and pressure. It tells you when to replace your brush head so you continue to get the best results. You even have the option of ordering replacement brush heads directly from within the app.

Three modes, three intensities

With three intensity settings and three cleaning modes, FlexCare Platinum Connected offers optimal comfort with a truly deep clean. Use Clean mode for a superb everyday clean, or White mode for stain removal. If you need to pay extra attention to trouble spots, Deep Clean mode delivers exceptional results. Set the intensity to Low, Medium or High based on your personal preference. Set the intensity level to high for the best results.

Specifications

Design and finishing

Colour: White

Connectivity

Bluetooth® wireless technology: Connected brushing app

Power

Voltage: 110-220 V

Technical specifications

Operating time (full to empty): Up to 2 weeks
