- Contents are sterile and ready to use in approx. 8 minutes

Effective sterilization
- Extra protection through natural steam sterilization

Highlights

Holds up to 6 bottles

The sterilizer has a smart design that takes up little space in your kitchen, yet still fits six Philips Avent Bottles or two Philips Avent Breast Pumps. The two baskets inside can clip together to form a dishwasher basket, which makes pre-cleaning of smaller items like soothers and nipples much easier.

Sterile contents for 6 hours

Once the sterilization cycle has been completed, the contents inside the Philips Avent Electric Sterilizer will remain sterile for up to 6 hours if the lid is unopened.

Contents sterile in 8 minutes

With the Philips Avent Electric Sterilizer you can sterilize contents in as little as 8 minutes

Just add water

The Philips Avent Electric Sterilizer is very easy to use. Just add water, load the sterilizer with the contents you would like to sterilize and switch it on.

Natural steam sterilization

Sterilizing is all about protecting your baby from particularly harmful milk bacteria until his immune system is strong enough. The Philips Avent Sterilizer uses the hospital method of steam sterilization, which is quick, easy, and efficient, with no chemicals involved.
