HH1463/00

Take charge with ease and confidence

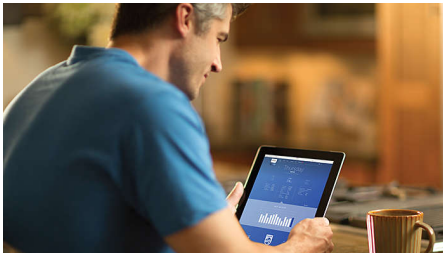

With easy-to-navigate menus, a sleek, compact design and quiet operation, DreamStation makes it simple to start, customize and continue your obstructive sleep apnea therapy.

Performance

- Support for the long term
- Make progress every day
- Small and lightweight
- Performance and appeal

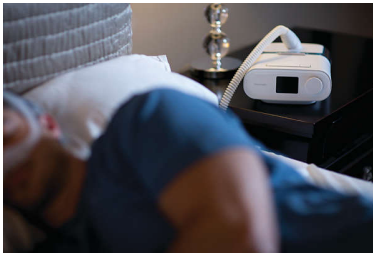

Highlights

Bluetooth enabled

Built-in Bluetooth makes connectivity to the DreamMapper self-management tool easy. DreamMapper provides goal-setting tools, helpful videos and ongoing feedback to keep you motivated and engaged.

Daily Progress Feedback

Each morning you are greeted with Daily Progress Feedback - a summary of how far you've come to motivate you to stick to your therapy. The intuitive, color display shows a simple trend of their nightly hours of use, followed by a summary of the last 30 days of good nights with more than four hours of use.

Small and lightweight

DreamStation's top-mounted humidifier hose swivel and front-facing display make it easy for you to operate while lying down or sitting up in bed. And, it's small and light, making it easy to pack for travel.

Performance and appeal

DreamStation offers a sleek, low-profile design. Its vibrant color screen displays daily progress and features easy-to-use menus.
