Vents air away from your baby's tummy

- Designed to reduce colic and discomfort

Highlights

Natural Response Teat

The Natural Response Teat works with your baby's natural feeding rhythm, making it easy to combine breast feeding and bottle feeding. The teat has a unique opening which only releases milk when the baby actively drinks. So when they pause to swallow and breathe, the milk pauses too.

Natural latch on

The wide, soft and flexible teat is designed to mimic the shape and feel of a breast, helping the baby to latch on and feed comfortably.

Anti-colic valve

Anti-colic valve is designed to keep air away from baby's tummy during feeding, to help reduce colic and discomfort.

No-drip teat

The teat opening is designed to release milk only when the baby is feeding. So you can confidently avoid milk loss whether at home or on the go.

Simple to use and clean

The wide bottle neck makes filling and cleaning easy. Only a few parts for quick and simple assembly.

Easy to hold

The ergonomic bottle is easy to grip at any angle to give maximum comfort during feeding. Easy for your hands and tiny hands to hold.

Bottle brush

Specially curved brush head and moulded handle-tip reach the corners of all wide neck bottles, teats and feeding products for thorough cleaning.*

Compatible across the range

Mix and match our breast pump, bottle and cup parts and create the product that works for you, when you need it.

BPA-free*

The Philips Avent Natural bottles and teats are made of BPA free* material.

Find the right teat flow

Every baby feeds differently and develops at their own pace. We've designed a range of flow rates so you can find the perfect one for your baby and personalise your bottle. All of the Natural Response Teats are made of soft silicone.
