## AVENT

Glass baby bottle that  
works like the breast

Natural Response

1 Bottle

4 oz/120 ml

Slow Flow 2 Teat

0-3 m

SCY930/01

## Supports baby's individual drinking rhythm

### A teat that works like a breast

The Natural Response Teat releases milk only when baby actively drinks. Babies can drink at their own rhythm like on the breast, so easy to combine breast and bottle feeding. Finding the right teat is important. See more info below.

#### Easy to combine breast and bottle feeding

- Natural latch on with breast-shaped teat
- Teat releases milk when baby actively drinks

#### Other benefits

- No-drip nipple design prevents spills and lost milk
- Simple to use, easy to clean and quick to assemble
- Same products, new navigation
- Choose the right teat flow for your baby
- Pharmaceutical grade glass, purity and heat resistance
- Natural Response Teats and Bottles are BPA free\*
- Be patient as your baby adjusts

#### Vents air away from your baby's tummy

- Designed to reduce colic and discomfort

#### Finding the right teat is important

# Highlights

### Natural Response Teat

The Natural Response Teat works with your baby's natural feeding rhythm, making it easy to combine breast feeding and bottle feeding. The teat has a unique opening which only releases milk when the baby actively drinks. So when they pause to swallow and breathe, the milk pauses too.

### Natural latch on

The wide, soft and flexible teat is designed to mimic the shape and feel of a breast, helping the baby to latch on and feed comfortably.

### Finding the right teat is important

If your newborn baby is consistently not taking enough milk throughout the feeding sessions or has complications in getting milk, switch to a teat with a higher flow rate. If persistent feeding issues occur, consult a healthcare professional.

### Anti-colic valve

Anti-colic valve is designed to keep air away from baby's tummy during feeding, to help reduce colic and discomfort.

### No-drip nipple

The nipple opening is designed to release milk only when the baby is feeding. So you can confidently avoid milk loss whether at home or on the go.

### Heat resistant glass

Made of premium quality borosilicate glass, the Philips Avent glass bottle is heat and thermal shock resistant. It can therefore be safely stored in the fridge, warmed, and is also suitable for sterilization.

### Find the right teat flow

Every baby feeds differently and develops at their own pace. We've designed a range of flow rates so you can find the perfect one for your baby and personalise your bottle. All of the Natural Response Teats are made of soft silicone.

### Same products, new navigation

We have moved to a pace-based flow navigation system. Start with the teat that comes with the bottle. Try a lower flow if milk is leaking from your baby's mouth or your baby is gulping. Try a higher flow if your baby is playing with the teat instead of drinking or seems frustrated. As we make this change, you may receive either style of pack.

## Natural Response

# Highlights

### Simple to use and clean

Wide bottle neck makes filling and cleaning easy. Only a few parts for quick and simple assembly.

### BPA-free\*

The Philips Avent Natural Response bottles and teats are made of BPA free\* material. Plus, all the Natural Response teats are made out of soft silicone.

### Be patient as your baby adjusts

Our new Natural Response Baby Bottles are different from free-flow baby bottles. Just like breastfeeding, it could take a few tries to get it right. That's perfectly natural.
