- Clean water is available whenever you turn on the tap
- One-piece water way design to protect against leakage

**PHILIPS**

Water purifier  
Under-the-sink Ultrafiltration, 2L/min, No power needed

WP4161/90

# Specifications

## Filtration performance

- Chlorine reduction
- Soluble lead reduction
- Bacteria removal: Yes, up to 99.9%\*
- Pesticide removal
- VOC reduction

## Filter specifications

- Filtration capacity: 4000L
- Main filter media: PE, Granular activated carbon/ GAC, Carbon block, Hollow fiber membrane

## Input water conditions

- Input water quality: Municipal tap water
- Input water temperature: 5-38 °C
- Input water pressure: 2-4 bar

## General specifications

- Replacement filter cartridge: WP3975, WP3977, WP3985
- Rated water flow rate: 2L/min

## Country of origin

- System: China
- Replacement filter: China

# Highlights

## 4-stage ultrafiltration system

The 4-stage AquaShield ultrafiltration system effectively removes up to 99.9% bacteria\*. It also removes heavy metals like lead, VOCs, pesticides and chlorine, while retaining beneficial minerals in the water.

## QuickTwist filter replacement

For ease-of-use the filter can be removed with a simple quick-twist without shutting off water to the system. The integrated disposable filter eliminates the internal system from getting contaminated.

## Work without power

The purifier works without power, so clean water is always available whenever you turn on the tap.

## Integrated waterway

Integrated waterway with one-piece design, which reduces the risk of water leakage.
