Enjoy healthy water

Effectively remove heavy metals, bacteria, viruses

The reverse osmosis membrane filter-RO effectively removes heavy metals , bacteria, viruses, pesticides, residual chlorine, antibiotics, and effectively reduce the hardness of water to remove scale.

Tasty water

- Remove heavy metal, virus, bacteria and antibiotics

Worry-free

- Keep secondary pollution away

Highlights

RO filter

The AquaShield RO multi-stage purification system can effectively remove heavy metals , bacteria, viruses, pesticides, residual chlorine, antibiotics—and effectively reduce the hardness of water to remove scale.

Integrated disposable filter

The integrated disposable filter eliminates the internal system from getting contaminated.

Specifications

Filter specifications

Filter precision: 0.0001um

RO specifications: 400G

Input water conditions

Input water quality: Municipal tap water

Input water temperature: 5-38 °C

Input water pressure: 0.15-0.4MPa bar

General specifications

Main filter media: Reverse osmosis membrane

Recommend filter lifetime: up to 36 months

Country of origin

Replacement filter cartridge: China
