## Pure water or no water

with Pure Protect Lock

Pure water or no water with Power UV+ removes bacteria, virus and cysts, even when there is no electricity and at your convenience. Pure Protect Lock locks dispensing of water when filter reaches lifetime or purifier error is detected.

### Pure water

- PureFlush flushes internal pipes and UV chamber of appliance
- Advanced UV technology and activated carbon to purify water

### Simplicity

- Purifies water in pre-set quantity, even in your absence
- Interactive and convenient settings, communicative interface
- Tilt & Twist mechanism for easy filter replacement

### Guaranteed

- Conforms to safety standards of Bureau of Indian Standards
- PureProtect alert warns you when filter needs replacement
- Microbiological performance tested as per NSF55 Class A
- WQA has certified and awarded Gold Seal to this product

# PHILIPS

# Highlights

## Power UV+

Advanced state-of-the-art UV (PLS) technology destroys known waterborne viruses, bacteria, parasites and amoebae while the activated carbon and sediment filter removes turbidity, chlorine, volatile organic chemicals (VOC's), cysts, larger micro-organisms and improves taste.

## IntelliFill

When the purifier senses water pressure, IntelliFill will start purifying and dispensing water upto the amount you have set. This way, available water is purified, even when you are away or asleep, and you will always be sure of having enough pure water when you need it.

## PureProtect alert

After 2700 liters of water consumption, PureProtect alert sends out a signal. There will still be enough capacity for another 300 liters after the signal.

## PureFlush

At the push of button, PureFlush automatically flushes all internal pipes and the UV chamber of the appliance. Ideal for cleaning before first use, after every filter change and whenever the appliance has not been used for some time. Thanks to PureFlush, you can be sure of Pure water even if you have been away for a while.

## Smart display

Interactive and convenient settings, communicative interface

## Tilt & Twist

Replacing the filter is something you can easily do yourself thanks to the simple Tilt & Twist mechanism.

## Certified by BIS

Product is certified according to microbiological performance standard BIS 14724 and Drinking water standard BIS 10500 by the Bureau of Indian Standards

## Gold Seal by Water Quality Association (WQA), USA

WQA (Water Quality Association, USA) only awards the Gold Seal to those systems, components or additives that have met or exceeded industry standards for contaminant reduction, structural integrity, and material safety. This product is certified by WQA to conform to NSF/ANSI 42 for the removal of chlorine and particulates (removes all classes of particulates from Class I till Class VI - particle size 0.5µm till 80 µm), NSF/ANSI 53 for the removal of turbidity, volatile organic chemicals (VOC's) and cysts and NSF/ANSI 55 Class A for microbiological disinfection.

## Tested by KIWA Water Research, The Netherlands

Tested by Kiwa Water Research: Microbiological performance tested by Kiwa Water Research (The Netherlands) according to the NSF standard 55, Class A protocol (2004).

# Specifications

## Purification system

- PLS UV lamp: 9 W

## Design specifications

- Product weight: 4.5 kg
- Product dimensions (L x W x H): 287 x 156 x 422 mm

## Input water conditions

- Min. input water pressure: 0.5 bar
- Min. input water temperature: 5 °C
- Max. input water pressure: 2.0 bar
- Max. input water temperature: 45 °C

## General specifications

- Water flow rate: max 1.2 l/min
- Voltage: 220-240 V
- Frequency: 50 Hz
- Power rating: 25 W
