

Philips  
Scale inhibitor

X-Guard power antiscalant

AWP9820

## Total protection for your home appliances

### Scale inhibit

Scale inhibitor comes with a 3-stage filtration, which effectively prevents scale formation and reduces particles, protecting your water heating appliances, such as water heaters, washing machines and dishwashers.

#### **Higher thermal efficiency and better protection**

- Effectively prevent scale from forming
- 3-stage filtration filters out sediments down to 40 microns
- Suitable for single appliance protection and cost effective

#### **Thoughtful design for your convenience**

- Fit with both 1/2 inch and 3/4 inch connectors
- Removable cap for easy refill

#### **environment friendly**

- Food grade, slow-release antiscalant
- BPA-free

X-Guard power antiscalant

# Specifications

## Filter specifications

- Filtration capacity: 27000 L
- Replacement filter cartridge: AWP183

## General specifications

- Filter lifetime: 6 months

AWP9820/10

# Highlights

## BPA-free

Made of BPA-free material.

## Effectively scale inhibit

MMSAP manages hard water by producing weak electric interference effects on hardness minerals ions, such as calcium and magnesium, as well as carbonate ions, preventing them from forming into scale.\*

## 3-stage filtration

The 3-stage scale inhibitor effectively inhibits scale formation and filters out sediments down to 40 microns, giving a total protection for your home appliances.

## Long-lasting antiscalant

X-Guard Power antiscalant for 27000 L capacity. Antiscalant life time up to 6 months.\*\*

## Environmentally friendly

Made of new Atoxic materials with stable physical and chemical properties, which will not cause phosphorus pollution.

## Easy installation

Adapters included to fit with both 1/2 inch and 3/4 inch connectors.

## Easy maintenance

Simple and quick maintenance with refills ready for use

\* \*It is not a softener. It does not remove calcium and magnesium from water as softeners do.

\*\*The actual lifespan of the filter cartridge depends on the local water quality and daily usage.
