

Philips  
Electric water heater

80 L, Storage  
2000 w

AWH1617

## Safety and comfort in your bathroom

### Comfortable and safe operation

The Philips electric water heater provides comprehensive protection. High-quality materials with additional protection help the water heater last longer. Step-heating technology provides fast heating with minimal energy consumption.

#### **Safety in your bathroom**

- RCD will provide your electrical protection
- Dielectric Couplings Static CARE

#### **User-friendly design**

- Simple mechanical control on the front panel
- Heating and power indicator lights on the control panel

#### **Step-heating technology for a faster bath**

- With a power of 2 kW provides fast water heating.

#### **High energy efficiency and energy saving**

- Remains a reduced temperature of 55 degrees Celsius

#### **Extended water heater life**

- DRY SHELL heating element is not in contact with water
- Water heater protection anode increased by 40%
- High-quality stainless steel inner tank

# PHILIPS

Electric water heater  
80 L, Storage 2000 w

# Specifications

## General specifications

- gross weight: 22.5 kg
- Product Dimensions (LxWxH): 493\*1005\*270 mm
- net weight: 20.5 kg
- Packaging Dimension(L)\*(W)\*(H): 555\*1090\*335 mm

## Main parameters

- Colour: White
- Rated Power: 2000 W
- Control type: Mechanical control

- Capacity: 80 L
- Voltage and frequency: 220-240/50 Hz
- Installation way: Vertical installation
- Heating type: Single heating element, Casting-aluminium heater

## Country of origin

- Made in: China

## Service

- Warranty period: 2 years

AWH1617/51

# Highlights

## Your electrical protection

In the event of an electrical leakage, the residual current device will cut off the power to the water heater.

## Non-contact heating element

The heating element is placed in an outer housing that protects it from water, scale and corrosion. The outer housing is covered with a SHELL glass-ceramic coating.

## Oversized Anode

The magnesium anode is increased by 40% compared to normal anodes. The anode catches the currents, preventing the walls of the tank from collapsing.

## Mechanical control

It is easy to operate the device using a mechanical knob on the front of the panel.

## Static CARE protection

Static CARE dielectric couplings will protect you and your loved ones from static current, as well as the electronic parts of the device.

## Heating and power indicators

Clear light indicators for heating and power on the control panel for your comfortable use.

## OptimalTEMP mode

Set the temperature control knob to the "OptimalTEMP" position and the water heater will always maintain a comfortable temperature of 55 degrees Celsius, while saving energy consumption.

## Stainless steel inner tank

The inner tank is made of high-quality stainless steel, is corrosion resistant and does not emit harmful substances when heated.

## Two-stage heating technology

The adjustable power of the two-stage heating element allows you to quickly heat the water in an energy-saving way.
