- 75" image in your pocket
- Advanced LED Light Source
- TI DLP technology

Easy Connection

- Ready for the road

Sound and battery

- Speaker
- Long-lasting, PowerBank Ready!

Highlights

Advanced LED Light Source

The powerful LED light source displays rich, vivid colors and will last up to 30,000 hours. You won't need to replace it since it lasts 20 years with an average usage of 4 hours per day! Additionally, the power consumption is far lower than a regular lamp based projector, which means you benefit from a bigger screen and fully immersive experience, all through an eco friendly device!

75" image in your pocket

GoPix 1 is the smallest and brightest projector out there projecting a massive 75" display pocket. It is equipped with the latest TI DLP LED light source that lasts over 30,000 hours. You can easily connect it to your phone, laptop or game console to enjoy all the entertainment you like in any room and position! The GoPix 1 is so small that you can carry it in your suit pocket.

Long-lasting, PowerBank Ready!

Thanks to the micro USB port, you can connect any power bank and extend the projector's battery life wherever you go!

Ready for the road

The USB-C video port lets you connect to all your smart devices including laptops, smartphones, or tablets to watch all your favorite content. You can also use the USB-C charge with any PD charger so you won't need to bring extras in your bag. There is also a versatile HDMI port that gives you the freedom to connect all your other devices.

Speaker

No need for extra sound systems, the built-in speaker delivers the performance you need in a small package.

Ultimate design

A super slim 18mm projector featuring premium dark grey metal finish with glass protection lens. The cabinet design has been engineered to create a passive heat dissipation. Moreover, both the cabinet vent system and speaker moulding have been designed for improved rigidity.

Versatile stand, Auto Keystone

The tripod screw allows for dynamic visual orientation and projection. You can project a range of entertainment on the ceiling, wall, or mount it on your laptop and always get a straight image thanks to the auto keystone.

TI DLP technology

Texas Instruments DLP technology, used in 9 out of 10 cinemas worldwide, delivers vivid pictures, deep contrast, and a bright image in any conditions.
