- ChromeCast Built-in

Ultra connected

- Multiple Connections
- Bluetooth Connectivity

Remarkably compact

- Quality stereo speakers

Highlights

Advanced LED Light Source

The powerful LED light source displays rich, vivid colors and will last up to 30,000 hours. You won't need to replace it since it lasts 20 years with an average usage of 4 hours per day! Additionally, the power consumption is far lower than a regular lamp based projector, which means you benefit from a bigger screen and fully immersive experience, all through an eco friendly device!

Android TV Experience

Your Philips Android TV Projector gives you the content you want when you want it. You can customise the home screen to display your favourite apps, making it effortless to start streaming the movies and shows you love or pick up where you left off. Our OSD has a new intuitive UI design, which makes it a breeze to navigate and find your way around. Powered by the fastest AMLOGIC CPU, it provides a smooth, best in class Android TV experience.

Bluetooth Connectivity

With the built-in Bluetooth functionality, you can easily connect wireless speakers directly to the Android TV dongle for better sound. Have a mouse, keyboard, or other remote controls too? No worries, you can connect any of those accessories to control Android TV or play games with an external Bluetooth Gamepad.

ChromeCast Built-in

Chromecast built-in is a technology that allows you to stream your favorite entertainment and apps from your phone, tablet, or laptop right to your TV or speakers. Your phone acts as a simple, powerful remote. Just open the mobile apps you already know and love to quickly access your TV shows and playlists. No new log-ins or downloads required. You can use your phone to search, browse, queue and

control the projector from anywhere in the home, and keep using it without disrupting what's playing or draining your battery.

Customize your projection

Place the product where ever you want! The keystone correction combined with the focus technology allow you to fine-tune images to your needs and place your projector at any distance.

Multiple Connections

Connect all your favorite devices via HDMI (like smartphone, tablet, laptop, gaming console), and play all your videos, pictures, and audio files from a USB thanks to the built-in multimedia player. There is also a 2x HDMI, USB and Jack 3.5 to connect external speakers. The additional Wi-fi MIMO Dual Band technology reduces buffering and is ideal for online gaming or watching Full HD movies.
