

PHILIPS

AVENT

Manual Breast Pump

Easily pump, store and feed

Basic set

SCF430/13

Comfortable pumping, wherever you go

Natural Motion Technology, for quick milk flow

The Philips Avent Portable Manual Breast Pump with Natural Motion Technology, inspired by baby's suckling for quick let down. Fits all nipples and easily adjustable rhythm and vacuum. Finding the right nipple is important. See more below

Easy to clean

- Easy to clean and set up

Other benefits

- Choose the right teat flow for your baby

Comfortable expression

- Easily triggers milk release before or between feeding
- Express without leaning forward
- Express, store and feed
- Choose your rhythm, follow your milk flow

Portable and convenient

- Ideal for moms who pump on-the-go

Simple, gentle and effective

- One-size soft adapting silicone cushion
- Helps you release milk fast

Highlights

Natural Motion Technology

The innovative silicone flange - inspired by baby's unique suckling action - stimulates the nipple to help start your milk flow, fast. For comfortable and effective expression.

Adapts to your nipples

One size fits all. Because we all come in different shapes and sizes, the silicone cushion gently flexes and adapts to fit your unique anatomy. Fits 99.98% of all nipple sizes* (up to 30mm).

Finding the right teat is important

If your newborn baby is consistently not taking enough milk throughout the feeding sessions or has complications in getting milk, switch to a teat with a higher flow rate. If persistent feeding issues occur, consult a healthcare professional.

Portable and easy to use

The breast pump is small and lightweight, which means it is easy to store and transport, making pumping on-the-go simple and discreet.

Find the right teat flow

Every baby feeds differently and develops at their own pace. We've designed a range of flow rates so you can find the perfect one for your baby and personalise your bottle. All of the Natural Response Teats are made of soft silicone.

Fast milk release

A unique, portable manual breast pump – ideal for mothers who need to gently release their milk while away from home, or before breastfeeding.

Suction and flow control

Feel free to adjust the pumping rhythm and suction to suit your needs, comfort and milk flow.

Highlights

Sit comfortably

Relax and sit comfortably while you express - thanks to our design that lets you sit upright, rather than having to lean forward.

Easy to clean and set up

Because there are only a few parts, our new pump is easy to set up and clean.

Express, store and feed

Express directly into the storage cup, which prevents leakage or spillage. When baby's hungry, simply attach the soft teat to the cup for feeding. Save your milk in the fridge or freezer and choose your preferred storage solution, bags or cups.

Specifications

Material

Breast pump: BPA-free*
