- Sonicare dynamic cleaning action drives fluid between teeth

Highlights

Up to 7x better plaque removal

Removes up to 7x more plaque than a manual toothbrush for a superior clean

Removes more plaque between teeth

Removes more plaque between teeth

Helps prevent cavities

By gently bursting away plaque that brushing missed, Sonicare AirFloss helps prevent cavities from forming in the spaces between your teeth.

Better gum health

Sonicare AirFloss is clinically proven to improve gum health in just two weeks.

30 Second Clean

With the AirFloss, cleaning your entire mouth takes just 30 seconds. Simply press the button once for a single burst, then move and repeat. To use the new auto-burst feature, hold down the button and move the guidance tip from space to space. It will automatically burst every second.

Air and micro-droplet tech

AirFloss utilizes unique air and micro-droplet technology to send a burst of pressurized air and water or mouthwash between your teeth. The one-touch activation button is as simple as a mouse click.

Better in hard-to-reach areas

The slim, angled neck and easy-grip handle of this toothbrush helps with better cleaning in hard-to-reach areas than a manual toothbrush

Highlights

Easy-fill reservoir

Fill the reservoir on the handle with either mouthwash or water for a refreshing clean, then point and shoot. The reservoir holds enough liquid for up to two uses.

Guidance tip

The slim angled nozzle and guidance tip make finding the correct placement easy. Just slide along the tooth's surface near the gum line until the tip fits into the groove between the teeth.

Sonic technology

Our sonic technology creates a unique dynamic cleaning action that drives fluid deep between teeth and along the gumline for a thorough-yet-gentle clean
