Smart technology for healthy oral-care habits A total clean for your patients' needs

Philips Sonicare ExpertClean acts as your patients' personal brushing guide, using smart sensor technology and Progress Reports to track habits and deliver feedback to improve their brushing technique and daily oral care routine.

Proven to improve oral health

- Increased surface contact for eliminating plaque
- Better gum care for overall health

Improves patients' oral health

- Removes 10 x more plaque* for a deep clean
- Up to 7 x healthier gums* in just 2 weeks

Designed around your patient

- 3 modes, 3 intensities
- Alerts patients of low battery
- For the most effective cleaning, every day
- Guides patients to use the correct amount of pressure
- Guides patients to better oral care habits
- Brush heads automatically select optimal settings

Highlights

Removes up to 10 x more plaque*

The C3 Premium Plaque Control brush head delivers our deepest clean. With soft flexible sides, the bristles contour to the shape of each tooth's surface to provide 4 x more surface contact** and remove up to 10 x more plaque from hard-to-reach areas*.

Up to 7 x healthier gums*

The G3 Premium Gum Care brush head improves patient gum health. Smaller size and targeted gum-line bristles deliver gentle, yet effective, cleaning along the gum line, where gum disease starts. It's clinically proven to deliver up to 100% less gum inflammation* and up to 7 x healthier gums in just two weeks.*

Progress Report

Sensors track and measure patients' brushing behaviours while the Philips Sonicare ExpertClean brush handle provides instant feedback. Over time, the Sonicare app retains and analyses these habits and generates a Progress Report to help promote better brushing techniques.

3 modes, 3 intensities

With three brushing modes (Clean, Gum Health, DeepClean+) and three intensity settings (Low, Medium, High), your patients can personalise their brushing experience for optimal comfort and a complete clean. See Specifications for more detailed information on modes.

Smart Brush Head Recognition

A microchip in the brush head syncs with the Philips Sonicare ExpertClean handle. If a patient clicks on a C3 Premium Plaque Control/Defence, G3 Premium Gum Care or W3 Premium White brush head, the toothbrush automatically selects the optimal brushing mode and intensity level. All your patients need to do is start brushing. It helps patients to have the best settings for the best performance and their needs

Pressure sensor

If patients apply too much pressure, the intuitive pressure sensor will gently pulsate the handle and give patients the real-time feedback they need to adopt a softer touch. In

a study of U.S. patients, 7 out of 10 aggressive brushers tested reduced their brushing pressure when using the pressure sensor.****

C3 Premium Plaque Control

C3 Premium Plaque Control is our deepest cleaning brush head yet. With soft flexible sides, the bristles contour to the shape of each tooth's surface to provide 4 x more surface contact and remove up to 10 x more plaque from hard-to-reach areas.*

G3 Premium Gum Care brush head

G3 Premium Gum Care is our best brush head for improving gum health. Its smaller size and targeted gum line bristles deliver gentle yet effective cleaning along the gum line, where gum disease starts. It's clinically proven to deliver up to 7 x healthier gums* in just 2 weeks.

Specifications

Connectivity

Bluetooth® wireless technology: Connected brushing app

Power

Voltage: 110–220 V

Technical specifications

Operating time (full to empty): 14 days***

Battery: Rechargeable
