- Pause when you want to
- Easily clean and assemble with fewer parts

Gentle and comfortable

- Soft silicone cushion offers comfort for every body

Quick expressing, more milk in less time*

- Natural Motion Technology gets milk moving quickly*

Rechargeable battery and timer display

Highlights

Quick milk flow*

Milk starts to flow in as little as one minute thanks to our unique Natural Motion Technology.** With a gentle latch-on and just the right massage and suction, it's no surprise that 97% of mums say the pump is effective*** and 100% of midwives recommend it.

Adapts to your nipple

Whatever your shape, the pump's soft, flexible silicone cushion meets your breast and nipple comfortably. Fitting 99.98%**** of breast sizes***, it adapts for a latch-on that's soft yet secure.

Finding the right teat is important

If your newborn baby is consistently not taking enough milk throughout the feeding sessions or has complications in getting milk, switch to a teat with a higher flow rate. If persistent feeding issues occur, consult a healthcare professional.

Find the right teat flow

Every baby feeds differently and develops at their own pace. We've designed a range of flow rates so you can find the perfect one for your baby and personalise your bottle. All of the Natural Response Teats are made of soft silicone.

Pumping on the go

The motor unit is compact and rechargeable. So you can get ready for your day (or just make a cup of tea) without pesky power cords holding you back.

Personalise to your needs

Get the most from every session with 8 modes for stimulating the flow of milk and 16 modes for expressing it. You can fine-tune as you go.

Easy to clean and set up

We designed our pump to be free from complexity. With just a few parts, it's also a breeze to clean and assemble.

Express anywhere discreetly

Our pump's motor is practically silent in use, so you can express at home (or anywhere) discreetly, and with one less distraction.

Start with your last session settings

The memory function automatically stores your last stimulation and expression settings. So all you need do is get comfortable and push start.

Highlights

Pause when you want to

You're in control. With one-touch pause/play, you can take a break from your session then resume it whenever you're ready.

Keep track of your expression time

Little things count, like our pump keeping track of your expression time. Use the digital display timer to keep track of your pumping duration, per breast and in total.

Insulated pouch

Wherever you pump, the custom-fit pouch takes you there, keeping your kit insulated and neatly bundled together. The stylish fabric is easy to clean, inside and out.

Specifications

Power

Mains voltage: 100V - 240 V
