Flows like a breast, aids to reduce feeding issues

A nipple that works like a breast*

Provides calm, comfortable feeds. The Natural Response Teat supports baby's unique suck, swallow and breathe rhythm, while the AirFree vent is designed keep air away from their tummy for extra protection against colic, gas and reflux.

Easy to combine breast and bottle feeding

- Nipple releases milk when baby actively drinks
- Natural latch on with breast-shaped nipple

Other benefits

- Simple to use, easy to clean and quick to assemble
- Easy to hold even for little hands
- Choose the right nipple flow for your baby
- No-drip nipple design prevents spills and lost milk
- Compatible across the Philips Avent range
- Natural Response Nipples and Bottles are BPA free*
- Be patient as baby adjusts

AirFree vent designed for less air ingestion

- Designed to reduce feeding issues

Highlights

Natural Response Nipple

The Natural Response Nipple works with your baby's natural feeding rhythm, making it easy to combine breast feeding and bottle feeding. The nipple has a unique opening which only releases milk when the baby actively drinks. So when they pause to swallow and breathe, the milk pauses too.

Natural latch on

The wide, soft and flexible nipple is designed to mimic the shape and feel of a breast, helping baby to latch on and feed comfortably.

Simple to use and clean

Wide bottle neck makes filling and cleaning easy. Only a few parts for quick and simple assembly, as AirFree vent is a single piece.

Easy to hold

The ergonomic bottle is easy to grip at any angle to give maximum comfort during feeding. Easy for your hands and tiny hands to hold.

Airfree vent

The AirFree vent is designed to offer extra protection against feeding issues by preventing air from getting into your little ones tummy while upright feeding.

Find the right nipple flow

Every baby feeds differently, and develops at their own pace. We've designed a range of flow rates so you can find the perfect one for your baby and personalize your bottle. All of the Natural Response Nipples are made of soft silicone.

No-drip nipple

The nipple opening is designed to release milk only when the baby is feeding. So you can confidently avoid milk loss whether at home or on the go.

Compatible across the range

Mix and match our breast pump, bottle and cup parts, and create the product that works for you, when you need it.

BPA free*

The Philips Avent Natural bottles and nipples are made of BPA free* material.

Be patient as baby adjusts

Our new Natural Response Baby Bottles are different from free-flow baby bottles. Just like breastfeeding, it could take a few tries to get it right. That's perfectly natural.
