- Philips is the choice of all major car manufacturers.
- Award winning car lamp manufacturer
- ${}^{\raisebox{-.4ex}{$\raisebox{3.4ex}{}}}}}}}}}}}}}}}} \quad Ne parksuperstands and the substituted and the substitutes and the subst$
- Philips car lamps are made of high-quality quartz glass
- Philips car lamps are highly resistant against humidity

Highlights

White light up to 3700K

The light emitted by the lamps BlueVision stimulates the concentration of the driver, as it enables greater visual comfort while driving.

More style to your motorcycle

BlueVision Moto up to 3700K white light to style up the bike

Change by pairs

Highly recommended to change them by pairs for symetric light performance

Car manufactuer choice

For 100 years, Philips has been on the forefront of the automotive lighting industry, introducing technological innovations that have become standard on modern automobiles. Today, one in two cars in Europe and one in three worldwide is equipped with Philips lighting.

Rewarded Car lamps

Our lamps are often rewarded by automotive experts

ECE homlogation

Philips Automotive is dedicated to producing best-in-class products and services in the Original Equipment Manufacturer market as well as in aftermarket. Our products are manufactured from high-quality materials and tested to the highest specifications to maximize the safety and driving comfort of our customers. Our entire production is meticulously tested, controlled and certified (ISO 9001, ISO 14001 and QSO 9000) to the highest ECE requirements.

High quality quartz glass

UV-Quartz glass is stronger than hard glass and highly resistant to temperature extremes and vibrations, which eliminates the risk of explosion. Philips quartz-glass lamps (filament 2 650° C and glass 800° C) are able to withstand severe thermal shock. With the capability of increased pressure inside the lamp, UV-quartz glass is able to produce a more powerful light

Resistance against humidity

Only a burning bulb made of quartz glass (filament 2650°c, glass 800°c) can resist thermal shocks: if a drop of cold water touches the hot bulb, which can happen when you drive through water with a broken headlight unit.
