- Long-life bulbs

Plug-and-play solution

- Effortless upgrades

See and be seen

- Quality, cool white light

Reliable Quality

- Trust the brand – reliable Philips quality

Highlights

Up to 6000 Kelvin white light

For a contemporary, cool-white-light look, upgrade your car headlights with Philips Ultinon Pro3021 LED bulbs. Featuring powerful LED chips with a colour temperature of 6000 Kelvin, these superior bulbs are designed for maximum driving comfort. Spot obstacles faster and drive with more confidence without dazzling other road-users. Get both performance and style with our Philips Ultinon Pro3021 LED bulbs.

Long-life bulbs

The right LED light is a quality light that lasts longer. Philips Ultinon Pro3021 bulbs have a durable design with a high-performance heat sink that diverts heat away from the light's critical components. They offer up to 2000 hours' lifetime, which can be as much as four times longer than the halogen bulbs they replace***.

Easy installation

Optimised LED bulb size is key because some optics can be very small. While other LED retrofit solutions on the market may feature an external driver box, our Philips Ultinon Pro3021 LED offers an integrated driver box, making installation quicker and hassle-free. The compact design fits a wider range of car models and can be easily installed by specialist mechanics. Make the change you need! Follow the step-by-step instruction guide here**** and indicative compatibility list here*****.

Up to 100% more brightness*

Philips Ultinon Pro3021 LED car headlight bulbs increase your visibility by up to 100%*. While some other LED bulbs might disappoint, usually because their lumen or brightness claims might fall short in real-world conditions, these bulbs provide a solid performance and quality light. Their homogeneous beam lets you see more clearly without dazzling other road-users, and their high luminance ensures a consistent light output in front of the car. For a good forward beam, it's important that the LED bulbs are correctly positioned in the headlight unit. So don't skip the alignment — take your time and do it right.

Effortless upgrades

Some car models might pose specific challenges for LED-based retrofit bulbs. That's why we've developed smart Philips accessories like the Philips Adapter rings and CANBus adapter, so that drivers can upgrade to LED technology on a wider selection of car models. Check if you need the optional Philips LED accessories to ensure the best fit with your car. Find more information on Philips accessories here*****.

Reliable Philips quality

Technologically advanced Philips automotive lighting is renowned in the automotive industry and has been for over 100 years. Philips Automotive Grade Quality products are designed and developed following strict quality-control processes, leading to consistently high production standards.

Specifications

Marketing specifications

Expected benefits: Stylish white light
