Highlights

Brighter light for more safety

With Philips X-tremeVision Pro150, you enjoy brighter light. Drive home to your loved ones knowing you can see clearly even in darkness and adverse weather conditions.

A lifetime of safety

The rigorous testing and high-standard production ensures that Philips signalling bulbs provide good lifetime for reliable service.

Match the headlights' colour

Having different colours in the headlight and position light is a thing of the past. With Philips X-tremeVision Pro150, you can bring the same whiter look into the signalling bulbs as you enjoy from your high-performance headlights.

Change both bulbs at once

It simply makes more sense to change headlamp bulbs in pairs, rather than only replacing the failed one. Modern bulbs provide increased light output and superior performance, offering a safer driving experience. By replacing bulbs in pairs, you save time and cost, avoid the risk of headlight failure, benefit from a brighter and better balanced beam but above all, you make driving safer for yourself and your loved ones.

Highest quality car lighting

Technologically advanced Philips lighting is renowned in the automotive industry and has been for over 100 years. The Philips Original Equipment Quality products are designed and developed following strict quality control processes (including applicable ISO norms), leading to consistently high production standards. Philips X-tremeVision Pro150 is compatible with car models of major brands, such as Audi, BMW, Ford, GM, Toyota and Volkswagen. See the product selector guide for more information.
