- Maximum driving comfort and safety

DOT Compliant

- Philips X-tremeVision headlights are DOT compliant

Original Equipment manufacturer

- Philips is the choice of major car manufacturers

Excellent choice for nighttime driving

- Replace your headlights in pairs for more safety

PHILIPS

Features

High quality and visibility

X-tremeVision provides you with a better reactivity thanks to an earlier recognition of obstacles and traffic signs. Light is a fundamental part of the driving experience and light is the first and only part of the safety circle that actually helps prevent accidents. Philips promotes active safety protection to prevent accidents by increasing overall visibility and road illumination.

More vision where it matters

For over 100 years, Philips has been at the forefront of the automotive lighting industry, introducing technological innovations that have become standard on modern automobiles. Today, one in three cars worldwide is equipped with a Philips light source.

Replace in pairs

Headlight bulbs put out less light as they age. That means that old bulb is giving you less nighttime visibility that you would have with 2 new bulbs. Putting in a new pair gives you all the light you should be getting for maximum driving safety for you and your family.

Unique filament design

Made for drivers who want to see farther, X-tremeVision offers maximum comfort and safety.

Up to 100% more vision

Based on a unique filament design and optimized geometry, X-tremeVision is engineered with state-of-the-art technology for ultimate performance.
