Specifications

Marketing specifications

- Expected benefits: interior, Position
- Product highlight: Brighter, vibrant signals

Product description

- Application: Interior, Position
- Base: W2,1x9,5d
- Designation LED Type: LED-T10 [-W5W]
- Homologation ECE: NO
- Range: X-tremeUltinon LED
- Technical features: CeraLight
- Technology: LED
- Type: W5W

Lifetime

- Life time: Up to 12 years

Light characteristics

- Color temperature: Up to 6500K
- Lumens [lm]: 50

Electrical characteristics

- Voltage: 12 V

Ordering information

- Order entry: 127996500KX2
- Ordering code: 39827430

Packaging Data

- EAN1: 8727900398274
- Packaging type: X2

Packed product information

- Length: 6.8 cm
- Width: 2.8 cm
- Height: 9.2 cm
- Pack Quantity: 2
- MOQ (for professionals): 20

Outerpack information

- Length: 19.5 cm
- Width: 15.1 cm
- Height: 8.5 cm
- Gross weight per piece: 0.37 kg

Highlights

Stylish signaling colors

While the main goal of exterior lighting is to help you see and be seen, there's no reason why you shouldn't look good at the same time. If you're looking to upgrade your style, without buying a newer car, replacing your exterior lighting with LEDs is a smart way to spend your money. Upgrade your exterior lighting with a more intense red for stop lights, a vibrant amber for turning signals and bright white light for positioning and reversing. Your car is an expression of who you are, so make a style statement with Philips exterior signaling LED lights.

CeraLight ceramic heat guard

Philips CeraLight technology is a unique ceramic-based patented casing, designed to insulate the LED components from heat and vibrational damage. This innovation protects the light against early failure. A T10 lamp equipped with CeraLight is built to last, providing drivers with a more durable light.

Uniform light distribution

Philips LED exterior lighting range is designed for a smarter light distribution to ensure that exterior signaling light is projected where you need it (whether that's reversing, stopping, or signaling). With wide angle and uniform light diffusion, not only can you see more of the road, other drivers can see more of you.

Automotive grade quality

The technologically advanced Philips lighting is renowned in the automotive industry, and has been for over 100 years. The Philips Automotive Grade Quality products are designed and developed following strict quality control processes (including applicable ISO norms), leading to consistently high production standards. Major car manufacturers choose Philips lamps, because when you buy Philips, you buy quality. You get powerful bright light, and precise beam performance. You get high-end style. And you get an advanced LED lighting system for a safer, smoother and more enjoyable drive.

Ready, steady, installed!

Designed to be easily installed in compatible vehicles, drivers with maintenance experience will be able to upgrade compatible lights with ease. However, it's recommended that you get your new Philips X-tremeUltinon LED lights installed by specialist mechanics – they will make sure you're ready to go. While these lamps are compatible with a wide range of existing car models, not all car types are supported.
