CityVision Moto

Type of lamp: H7

Pack of: 1

12 V, 55 W

Style

12972CTVBW

Feel safe, ride safe

See and be seen

For better safety and visibility in city traffic, Philips has designed CityVision Moto lights with a distinctive, attention-grabbing orange effect in the headlight. CityVision Moto bulbs also produce up to 40% more vision.

Be seen in traffic

- Distinctive orange effect in the headlight
- 40% more vision
- Designed for city riders
- Vibration resistance up to 10G

State-of-the-art technology

- Philips is the choice of major motorbike manufacturers.
- Respecting the high quality standards of ECE homologation

Vibration resistance

- Philips moto lamps are made of high-quality quartz glass

Highlights

Designed for city use

Philips CityVision Moto headlights are specifically designed to improve the rider's safety in a city environment. The attention-grabbing orange effect and the 40% increase in light output allow a safer riding experience in traffic and play an active role in accident reduction.

Distinctive orange effect

Philips CityVision Moto headlights have been specifically developed for city riders. Thanks to their distinctive orange effect, Philips motorcycle bulbs grab the attention of drivers and guarantee earlier recognition of the rider.

ECE homologation

Philips Automotive is dedicated to producing best-in-class products and services in the Original Equipment Manufacturer market as well as in the aftermarket. Our products are manufactured from high-quality materials and tested to the highest specifications to

maximise the safety and driving comfort of our customers. Our entire production is meticulously tested, controlled and certified (ISO 9001, ISO 14001 and QSO 9000) to the highest ECE requirements.

High-quality quartz glass

UV-Quartz glass is stronger than hard glass and highly resistant to temperature extremes and vibrations, which eliminates the risk of explosion. Philips quartz-glass lamps (filament 2650° C and glass 800° C) are able to withstand severe thermal shock. With the capability for increased pressure inside the lamp, UV-quartz glass is able to produce a more powerful light.

Manufacturers' choice

For 100 years, Philips has been at the forefront of the automotive lighting industry, introducing technological innovations that have become standard on modern automobiles. Today, one in two cars in Europe and one in three worldwide is equipped with Philips lighting.

Vibration resistant

Philips CityVision Moto lamps are designed with state-of-the-art technology to resist vibrations up to 10G and last longer. Those motorcycle bulbs are mounted with an extremely resistant double coil filament to withstand a wide range of vibrations including physical shocks.

Greater light-beam projection

Offering 40% more vision on the road, the Philips CityVision Moto headlights actively participate in increasing the rider's security. Thanks to better visibility on the road Philips motorcycle lamps allow for better obstacle recognition and accident prevention.

Specifications

Packaging Data

Packaging type: Blister
EAN1: 8727900398984
EAN3: 8727900398991

Electrical characteristics

Voltage: 12 V
Wattage: 55 W

Lifetime

Lifespan: 400h

Light characteristics

Lumens: 1500
Colour temperature: Up to 3200 K

Marketing specifications

Product highlight: See and be seen
Expected benefits: More light

Product description

Designation: H7 CityVision Moto
Range: CityVision Moto
Technology: Halogen
Base: PX26d
Application: High beam, Low beam
Type: H7
