Drive with style

Silver-coated design indicator

SilverVision signalling lamps are designed for drivers seeking to personalise their vehicles. With SilverVision, drivers enjoy a full Chrome effect in the front and rear indicators.

Chrome effect

- Indicator bulbs with Silver coating

Original Equipment manufacturer

- Philips is the choice of major car manufacturers
- Change both indicator bulbs at once for maximum effect
- Complying with the high quality standards of ECE homologation
- Wide range of 12-V lamps to meet all applications

Highlights

Car manufacturers' choice

For 100 years, Philips has been at the forefront of the automotive lighting industry, introducing technological innovations that have become standard on modern automobiles. Today, one in two cars in Europe and one in three worldwide is equipped with Philips lighting.

Change in pairs

We highly recommend that you change your indicator bulbs in pairs for a symmetrical effect.

Designed for multiple usage

Which 12-V lamp for which application? Philips' Automotive offering includes the following applications: front and rear indicators.

ECE homologation

Philips automotive products and services are considered best in class in the Original Equipment Manufacturer market and the aftermarket. Manufactured from high-quality products and tested to the highest specifications, our products are designed to maximise the safety and comfort of our customers' driving experience. Our entire product range is thoroughly tested, controlled and certified (ISO 9001, ISO 14001 and QSO 9000) to the highest ECE requirements. Put simply, this is quality you can trust.

Silver-coated design indicator

When turned off, Philips SilverVision bulbs prevent unaesthetic orange effects in the optics thanks to their unique Chrome coating. When turned on, they emit a homologated orange light.
