Specifications

Marketing specifications

- Expected benefits: Stylish white light
- Product highlight: Bright LED lighting that's easy to fit

Product description

- Application: High beam, Low beam
- Base: PX43t
- Designation: HL [~HS1]
- Homologation ECE: No, off-road use only
- Range: Ultinon Pro3022
- Technology: LED
- Type: HL [~HS1]

Lifetime

- Life time: Up to 1500 hours

Light characteristics

- Lumens: 500
- Color temperature: 6000 K

Electrical characteristics

- Wattage: 6 W
- Voltage: 12 V

Ordering information

- Order entry: 11636U3022X1
- Ordering code: 02007994

Packaging Data

- Packaging type: X1
- EAN1: 8719018020079
- EAN3: 8719018020086

Packed product information

- Pack Quantity: 1
- MOQ (for professionals): 4

Highlights

Reliable Philips quality

Technologically advanced Philips automotive lighting is renowned in the automotive industry and has been for over 100 years. Philips Automotive Grade Quality products are designed and developed following strict quality-control processes, leading to consistently high production standards.

Easy installation

Optimized LED bulb size is key because some optics can be very small. The compact design fits a wider range of motorcycle models and can be easily installed. Make the change you need! Follow the step-by-step instruction guide here***.

Improved visibility

While some other LED bulbs might disappoint, usually because their lumen or brightness claims might fall short in real-world conditions, the Philips Ultinon Pro3022 provides solid performance and quality light. Its homogeneous beam lets you see more clearly without dazzling other road-users, and its high luminance ensures consistent light output in front of the motorcycle. For a good forward beam, it's important the LED bulb is correctly positioned in the headlight unit. So, don't skip the alignment - take your time and do it right.

Long-life bulbs

The right LED light is a quality light that lasts longer. Philips Ultinon Pro3022 bulbs have a durable design with a powerful cooling system that diverts heat away from the light's critical components. They offer up to 1,500 hours' lifetime, which can be as much as four times longer than the halogen bulbs they replace**.

Up to 6000 Kelvin white light

For a contemporary, cool-white-light look, upgrade your motorcycle headlights with a Philips Ultinon Pro3022 LED bulb. Featuring powerful LED chips with a color temperature of 6000 Kelvin, these superior bulbs are designed for maximum driving comfort. Spot obstacles faster and drive with more confidence without dazzling other road-users. Get both performance and style with our Philips Ultinon Pro3022 LED bulbs.
