- ${}^{\raisebox{3.5pt}{\text{\circle*{1.5}}}}$  Philips automotive lighting at the highest quality level
- ${}^{\:\raisebox{3.5pt}{\text{\circle*{1.5}}}}$  Easy installation and compatible with many car models

## Highlights

#### **Bright and vibrant signals**

Whether it's your phone, your keys or your child's missing left shoe, at some point we've all had to search for a misplaced item in a poorly lit car. With Philips LED interior lighting, you get a warm, bright and uniformly diffused light. So the next time you're searching around in the trunk, the glove compartment or the floor of your car, you'll be able to see exactly what you're doing and find anything with ease.

#### Stylish signaling colors

While the main goal of exterior lighting is to help you see and be seen, there's no reason why you shouldn't look good at the same time. If you're looking to upgrade your style, without buying a newer car, replacing your exterior lighting with LEDs is a smart way to spend your money. Upgrade your exterior lighting with a more intense red for stop lights, a vibrant amber for turning signals and bright white light for positioning and reversing. Your car is an expression of who you are, so make a style statement with Philips exterior signaling LED lights.

#### CeraLight ceramic heat guard

Philips CeraLight technology is a unique ceramic-based patented casing, designed to insulate the LED components from heat and vibrational damage. This innovation protects the light against early failure. A T10 lamp equipped with CeraLight is built to last, providing drivers with a more durable light.

#### **Uniform light distribution**

Philips LED exterior lighting range is designed for a smarter light distribution to ensure that exterior signaling light is projected where you need it (whether that's reversing, stopping, or signaling). With wide angle and uniform light diffusion, not only can you can see more of the road, other drivers can see more of you.

#### Automotive grade quality

The technologically advanced Philips lighting is renowned in the automotive industry, and has been for over 100 years. The Philips Automotive Grade Quality products are designed and developed following strict quality control processes (including applicable ISO norms), leading to consistently high production standards. Major car manufacturers choose Philips lamps, because when you buy Philips, you buy quality. You get powerful bright light, and precise beam performance. You get high-end style. And you get an advanced LED lighting system for a safer, smoother and more enjoyable drive.

#### Ready, steady, installed!

Designed to be easily installed in compatible vehicles, drivers with maintenance experience will be able to upgrade compatible lights with ease. However, it's recommended that you get your new Philips X-tremeUltinon LED lights installed by specialist mechanics — they will make sure you're ready to go. While these lamps are compatible with a wide range of existing car models, not all car types are supported.

## Specifications

#### **Packaging Data**

EAN1: 8727900398311 Packaging type: X2

#### **Product description**

Technology: LED

Application: Interior, Position Range: X-tremeUltinon LED

Type: W5W

Homologation ECE: NO Base: W2,1x9,5d

Designation LED Type: LED-T10 [~W5W]

#### **Electrical characteristics**

Voltage: 12 V

#### **Marketing specifications**

Expected benefits: interior, license plate Product highlight: Brighter, vibrant signals

#### **Light characteristics**

Color temperature: Up to 6500K

Lumens [lm]: 35

#### **Ordering information**

Order entry: 127976500KX2 Ordering code: 39831130

#### **Outerpack information**

Height: 8.5 cm Length: 19.5 cm Width: 15.1 cm

Gross weight per piece: 0.37 kg

#### **Packed product information**

Height: 9.2 cm Length: 6.8 cm Width: 2.8 cm

MOQ (for professionals): 20

Pack Quantity: 2

#### Lifetime

Life time: Up to 12 years
