## Highlights

### Brighter, whiter light output

Philips LED Headlamps feature our advanced LUXEON Altilon LEDs. This innovative technology delivers powerful, precise illumination and bright white 5600 K light output that's closer to the color temperature of daylight, while dramatically improving overall nighttime visibility

### Dual beam system

The split-lamp low beam and high beam offers a unique look, when on and off. In addition, the complex reflector design optimizes and evenly distributes for the best visibility and pattern.

### Extremely impact resistant

Unlike your traditional headlamp, the Philips LED Headlamp is bulb-free and electronics are encapsulated in hardened epoxy to resist damage caused by shock and vibration. The LED Headlamp features a military-grade die cast aluminium housing and an impact-resistant polycarbonate lens. The 'split-lamp' appearance offers a unique look when on and off, and their ultra-rugged construction make these LED headlamps ready for tough conditions - on road or off.

## Specifications

### Marketing specifications

**Expected benefits:** High-Performance LEDs  
**Product highlight:** 12 year-lifespan, 5x time more light, road legal LED

### Product description

**Application:** Headlight  
**Color temperature:** 5600  
**Designation:** Philips LED Headlamp  
**Light source:** 2 LED Arrays  
**Range:** LED Headlamp  
**Replaces:** 6014, 6015, 6016, H6024  
**Type:** 7" round

### Technical specifications

**Voltage:** 12 V
