GoSure Full HD rear camera

Crystal clear rear recording

Upgrade your dash cam

GRC20XM

Your reliable witness on the road

Automatically capture your journey in vivid detail

Philips GoSure ADR820 dash cam captures everything that happens on the road, in case of the unexpected. With this Full HD rear camera module to record also from the back of your car, you have full coverage of your journey.

Full HD rear camera to upgrade your dash cam

- Upgrade your dash cam with Full HD rear camera

Easy to install

- Plug-and-play Full HD rear camera

Highlights

Upgrade your dash cam

With Philips GoSure ADR820 you are fully protected on the road from the front. But how about the back of your car? Upgrade your dash cam with a Full HD camera module and enjoy your safe drive with crystal clear recordings of what happens both in front and behind your car.

Plug-and-play FHD rear camera

Don't worry about the installation of your Full HD rear camera module. It's easy. Simply fix the Full HD rear camera onto your rear windshield with the strong 3M tape, and plug it into your ADR820 with the cable provided. Now your car will be equipped with sharp eyes in the front and the back.
