Complete digital connectivity made simple.

- Seamless connectivity with 2 HDMI inputs and SPDIF output
- PC input allows you to use your TV as a PC monitor
- Fantastic photo & music playback via USB

PHILIPS

LCD TV
107cm (42") Full HD 1080p

Highlights

2 HDMI Inputs

HDMI makes an uncompressed digital RGB connection from the source to the screen for the ultimate picture quality. HDMI uses HDCP copy protection. With 2 HDMI inputs on the back of the TV you can connect multiple HD sources, for instance an HD settop box, a Blu-ray player, and Game Console or Digital Camcorder.

ECO Mode

The Active Control intelligently adjusts the backlight, resulting in beneficial environmental & energy conservation. TV with Active Control has greater energy savings than normal TVs.

Full HD LCD Display 1920 * 108

The Full HD screen has the widescreen resolution of 1920 x 1080p. This is the highest resolution of HD

sources for the best possible picture quality. It is fully future proof as it supports 1080p signals from all sources, including the most recent like Blu-ray and advanced HD game consoles. The signal processing is extensively upgraded to support this much higher signal quality and resolution. It produces brilliant flicker-free progressive scan pictures with superb brightness and colors

PC Input (HDMI + VGA)

With PC input you can use your TV as a PC monitor either using a HDMI-DVI cable (for digital signals) or VGA cable (for analog signals).

Smart Volume

Philips preset modes for Smart Sound provide you with direct access via a single key on the remote control. You can select optimized sound settings for the various sound modes.

USB (MP3 + JPEG)

The USB connector allows access to jpeg photos and mp3 music of most USB-sticks (USB memory-class device). Plug the USB into the slot at the side of the TV and access the content. You can now view and share your photos and music.
