Product highlights New generation LCD Panel

New generation LCD Panel offers superior entertainment with a wider viewing angle, a faster response time and natural brilliant colors. Minimal 'color shift' i.e. uniform natural colors when viewed from different angles, is a key picture performance

factor for LCD TVs.

Digital Crystal Clear

A unique package of picture innovations including Combfilter, Dynamic Contrast., Color Enhancement, and Luminance Transient Improvement resulting in more contrast, natural colors and a high level of detail.

Full Active Control

Active Control delivers the best picture setting, any time, any source. The incoming signal is automatically analysed and key picture settings are adjusted; sharpness, noise reduction, color and contrast. The ambient light sensor adjusts the settings according to the viewing conditions in the room.

Motion Adaptive De-interlacing

A smart de-interlacing algorithm which is able to detect the type of video source such as Still Picture, Motion Picture or Film and automatically optimize the deinterlacing process with Spatial, Temporal or Film mode de-interlacing to deliver razor sharp and stable images at all time.

Virtual Dolby® Surround

Enjoy enhanced cinema surround sound effect without the need for rear speakers.

FM Radio

Listen to all your favorite radio channels (40 presets) and view details of the channel on your screen.

Multiple PIP

Multiple Picture-in-Picture modes allows simultaneously watching 2 video sources either picture-in-picture or side by side.

Digital Connectivity

With the DVI Digital PC input, superior picture quality can be achieved when used as PC monitor.
