- Relief® ACP Oral Care Gel helps manage patient's sensitivity

### **Enamel protection**

- Gentle and safe

# PHILIPS ZOOM!

# Specifications

# Highlights

## **Reduces sensitivity**

Clinical tests comparing Philips Zoom NiteWhite ACP with a NiteWhite formula containing no ACP showed that 30% of patients who used NiteWhite with ACP experienced less sensitivity, with twice as many patients experiencing zero sensitivity.

## **Improves appearance**

Tooth whiteners with ACP also improve the cosmetic appearance of teeth by restoring enamel lustre to create a smoother, glossier appearance.

## **Enamel protection**

The deposition of hydroxyapatite onto teeth protects enamel and restores lustre through the remineralisation process.
