Rapid installation. Total control.

- AppControl. Install and manage apps remotely and securely
- CMND and Control. Operate, update, maintain
- Medical-grade power supply
- MyChoice compatible. Built-in pay-to-view solution
- Optional long DC power cable for mounting to a wall arm

PHILIPS

Highlights

Chromecast built in

Enable hassle-free wireless casting of movies, presentations and more from smart devices (mobiles, laptops, tablets) to your Android-powered Philips Professional TV. Chromecast is cost-effective, requires no extra hardware and is secure for professional use. Users simply tap the Chromecast icon on their smart device to start streaming content from thousands of cast-enabled apps — their smart device becomes the remote.

Google Play Store

With one-touch access to the Google Play Store, it's easy to add apps, games, music, movies and more to your Philips Professional TV.

Tough glass front.

The toughened safety-glass front is flat, making it easy to clean. The glass is hydrophobic, repels fingerprints and has no raised buttons, meaning it has no crevices for germs to get into. The built-in touch-sensitive controls can be conveniently disabled for cleaning via a button on the TV's back.

Easy to use.

The front panel of this Philips Professional Healthcare TV features integrated touch controls. Essential controls are conveniently placed, and illuminate when patients raise a finger to them - ensuring ease of operation.

Reading light.

Give them the freedom to read, day or night. A reading light is conveniently placed under the bottom bezel of this Philips Professional Healthcare TV. The light is operated by a button on the front touch-control panel: the button illuminates when a finger or hand is near it.

Isolated headphone

Galvanic isolation ensures the safest possible connection between the patient's headphones and this Philips Professional Healthcare TV. No current can pass from the headphone circuit into the surrounding electrical environment, ensuring the protection of both the patient and sensitive medical instruments.

CMND and Control

Run your display network over a local (LAN or RF) connection. CMND & Control allows you to perform vital functions like controlling inputs, updating software and monitoring display status — whether you're in charge of one TV or more.

AppControl

Take full, centralised control of the apps installed on your Philips Professional TVs. AppControl lets you install, delete and manage apps on selected TVs or your entire network. Giving you the ability to offer personalised experiences to your guests and customers — no matter how many TVs you are managing.

Built-in pay-to-view solution

Offer pay-to-view content in any situation - from a complete pay-to-access-all-channels model to selected premium content. MyChoice is an integrated solution that allows viewers to access pay-per-view channels via a code or a card.

Medical-grade power supply

This Philips Professional Healthcare TV incorporates a power supply that complies with both EN/IEC 60601-1 and EN/IEC 60601-1-2 standards.

Optional long DC power cable

Optional long DC power cable for mounting to a wall arm

Antimicrobial housing

Germs have become a growing problem in hospitals and clinical environments worldwide as they can cause life-threatening infections. Philips CareSuite TVs take care of this challenge by using a JIS Z2801-compliant antimicrobial additive in their housing material, making it an integral part of the display housing. Your well-being—and with that of your patients—is now assured by this protective shield, which impedes the growth of most common microorganisms such as *Staphylococcus aureus* (Gastroenteritis), *Escherichia coli* (E Coli) and *Klebsiella* (Pneumonia), for example.

Specifications

Picture/Display

- Diagonal screen size (inch): 19 inch
- Diagonal screen size (metric): 47 cm
- Display: LED HD TV
- Panel resolution: 1366 x 768p
- Brightness: 250 cd/m²
