Highlights

Ambilight Spectra

The sensorial halo of Ambilight Spectra extends the light and atmosphere of the image far outside the screen. You feel fully immersed in the images, it adds a magical dimension to the viewing experience. The Aurea has a high quality design with a unique edge to edge front cut from a single piece of crystalline glass. The Active Frame transforms from a stylish design object into a lively sensation of color and light. Over 150 power LEDs positioned around the screen create a soft, multicolored halo directly enveloping the screen and flowing seamlessly on to the wall.

Perfect Pixel HD Engine

The result is a unique combination of sharpness, natural detail, vivid colors superior contrast and smooth natural motion whatever you are watching. Clean and razor sharp images result from artifact and noise detection

and reduction in all content sources - from multimedia to standard TV.

even smoother and quieter pictures with excellent sharpness. Enjoy motion performance that surpasses cinema quality!
