# Highlights

## Full HD 3D Ready TV

Available for use with your Philips Full HD 3D Ready TV (see related products for compatible TVs)

## 3D transmitter

3D transmitter is easy to install and communicates between the TV and your Active 3D glasses.

## Additional Active 3D glasses

If you want to enjoy the 3D experience with your whole family, you can buy additional pairs of Active 3D glasses (extension kit PTA03 or PTA516).

## Full HD 3D Ready

Be enthralled by 3D movies in your own living room on a Full HD 3D TV. Active 3D uses the latest generation of fast switching displays for real life depth and realism in full 1080x1920 HD resolution. By watching these images through special glasses that are timed to open and close the left and right lenses in synchronization with the alternating images, the Full HD 3D viewing experience is created. Premium 3D movie releases on Blu-ray offer a wide and high quality content selection. The Blu-ray 3D feature will be available on this system after software upgrade (visit [www.philips.com/blu-ray](http://www.philips.com/blu-ray)).

## Easy installation on your TV

The installation of this 3D transmitter is simple and quick, just plug and play.

\* PTA215 is an extension kit and will not work stand alone. PTA03 or PTA516 glasses are compatible with this extension kit. Check Related Products to verify compatibility with the TV.

\* Health Warning:

\* If you or your family has a history of epilepsy or photosensitive seizures, consult a medical professional before exposing yourself to flashing light sources, rapid image sequences or 3D viewing.

\* To avoid discomfort such as dizziness, headache or disorientation, we recommend not watching 3D for extended periods of time. If you experience any discomfort, stop watching 3D and do not immediately engage in any potentially hazardous activity until your symptoms have disappeared.

\* Parents should monitor their children during 3D viewing and ensure they do not experience any discomfort as mentioned above. Watching 3D is not recommended for children under 6 years of age as their visual system is not fully developed yet.

\* Do not use the 3D glasses for any purpose other than watching 3D TV.
