TV-rondleiding

Professionele modus

Wat u kunt doen

Met de professionele modus AAN hebt u toegang tot een groot aantal expertinstellingen waarmee u de status van de TV geavanceerd kunt regelen of extra functies kunt toevoegen.

Deze modus is bedoeld voor installaties van TV's op plaatsen zoals hotels, cruiseschepen, stadions of andere bedrijfslocaties waar een dergelijke regeling vereist is.

Als u de TV thuis gebruikt, raden wij u aan deze te gebruiken met de professionele modus UIT.

Raadpleeg de Professional-installatiehandleiding voor meer informatie.

Installatie

2.1

Veiligheidsinstructies lezen

Lees voordat u de TV gaat gebruiken eerst de veiligheidsinstructies.

2.2

TV-standaard en wandmontage

TV-standaard

In de Snelstartgids die wordt geleverd bij de TV, vindt u instructies voor het monteren van de TV-standaard. Bent u deze gids kwijtgeraakt, dan kunt u deze downloaden van www.philips.com.

Gebruik het producttypenummer van de TV om de juiste snelstartgids te downloaden.

Wandmontage

Uw TV is tevens voorbereid voor montage op een VESA-compatibele wandsteun (afzonderlijk verkrijgbaar). Gebruik de juiste VESA-code bij het aanschaffen van de wandsteun. . .

• 19HFL5014W
VESA MIS-F 75x75, M4 (min.: 8 mm, max.: 10 mm)

Let op

Alleen gekwalificeerde technici met de vereiste vaardigheden mogen de TV aan de wand bevestigen. De wandmontage van de TV moet voldoen aan veiligheidsnormen voor TV's in deze gewichtsklasse. Lees ook de veiligheidsvoorschriften voor u de TV bevestigt.

TP Vision Europe B.V. is niet verantwoordelijk voor het incorrect bevestigen of het bevestigen op een manier die leidt tot een ongeluk of verwonding.

2.3

Tips over plaatsing

- Plaats de TV op een plek waar er geen licht op het scherm valt.
- De ideale afstand om TV te kijken bedraagt driemaal het diagonale schermformaat. Als u zit, moeten uw ogen zich op dezelfde hoogte bevinden als het midden van het scherm.

Opmerking:

Plaats de TV uit de buurt van stof producerende apparaten, zoals een fornuis. We raden u aan om regelmatig stof te verwijderen om te voorkomen dat het in de TV komt.

2.4

Netsnoer

- Sluit het netsnoer aan op de voedingsaansluiting aan de achterkant van de TV.
- Zorg ervoor dat het netsnoer stevig in de aansluiting is geplaatst.
- Zorg dat u altijd gemakkelijk bij de stekker in het stopcontact kunt.
- Trek het netsnoer altijd aan de stekker en nooit aan het snoer uit het stopcontact.

Antennekabel

Sluit de antenne goed aan op de antenne-ingang aan de achterkant van de TV.

U kunt uw eigen antenne aansluiten of verbinding maken met een antennesignaal van een antenedistributiesysteem. Gebruik een IEC Coax 75 Ohm RF-antenneaansluiting.

Gebruik deze antenneaansluiting voor DVB-T- en DVB-C-ingangssignalen.

Montage van armsteun

3.1

Montagebeugel

U vindt de instructies voor het monteren van de montagebeugel in de snelstartgids op www.philips.com.

Gebruik het producttypenummer van de TV om de juiste snelstartgids te downloaden.

3.2

Montage van armsteun

Uw TV is tevens voorbereid voor montage op een VESA-compatibele armsteun (afzonderlijk verkrijgbaar).

Gebruik de volgende VESA-code bij het aanschaffen van de armsteun. . .

Gebruik om de steun stevig te bevestigen schroeven met de lengte die in de tekening is aangegeven.

- 19HFL5014W - VESA MIS-F 75x75, M4
geïnstalleerd met montagebeugel: (minimaal 14 mm, maximaal 16 mm)
- Geïnstalleerd zonder montagebeugel: (minimaal 8 mm, maximaal 10 mm)

Let op

Alleen gekwalificeerde technici met de vereiste vaardigheden mogen de TV aan de armsteun bevestigen. De montage van de TV-armsteun moet voldoen aan de veiligheidsnormen, overeenkomstig het gewicht van de TV. Lees ook de veiligheidsvoorschriften voor u de TV bevestigt. TP Vision Europe B.V. is niet verantwoordelijk voor onjuiste bevestiging of bevestiging op een manier die leidt tot een ongeluk of verwonding.

Opmerking

Verwijder de VESA-schroeven aan de achterzijde van het scherm voordat u de TV op de arm bevestigt.

Waarschuwing

Volg alle instructies die bij de TV-steun zijn geleverd. TP Vision Europe B.V. is niet aansprakelijk voor ongelukken, letsel of schade als gevolg van ondeskundige bevestiging van de TV.

Om schade aan kabels en aansluitingen te voorkomen, moet u een ruimte van ten minste 5,5 cm vrijlaten aan de achterkant van de TV.

Zoek de juiste lengte van de schroef voordat u de TV op de arm bevestigt. Om de lengte van de schroef te bepalen, telt u de dikte van de armbevestiging op bij de schroeflengte.

Toetsen van de TV

Gebruik het toetsenblok aan de voorzijde om het scherm te bedienen. Het toetsenblok bestaat uit de volgende toetsen:

- 1 Voeding: Hiermee schakelt u de TV of de stand-bystand in.
- 2 Dempen: Hiermee dempt u het geluid of schakelt u het weer in.
3. Zender CH+/-: Hiermee schakelt u naar de volgende of vorige zender in de zenderlijst.
4. Volume : Hiermee past u het volumeniveau aan.
5. Terug: Hiermee schakelt u terug naar de vorige zender. Hiermee gaat u terug naar het vorige menu.
6. Home : Hiermee opent u het Hoofdmenu.
7. Helderheid: Hiermee stelt u het helderheidsniveau van de lamp aan de onderkant van de TV in.
8. Sluiten: Hiermee kunt u weer televisiekijken.
9. Pijl-/navigatietoetsen: U navigeert met omlaag, met , naar links of rechts .
10. OK: Hiermee bevestigt u een selectie of instelling.
11. Klok: De huidige tijd weergeven. De wekker aanpassen.

In- en uitschakelen

5.1

Ingeschakeld of stand-by

Zorg ervoor dat de TV is aangesloten op de netspanning. Sluit het meegeleverde netsnoer aan op de AC in-aansluiting aan de achterkant van de TV.

Inschakelen

Druk op  om de TV in te schakelen.

Overschakelen naar stand-by

Zet de TV in de stand-bymodus als u de TV niet gebruikt.

Als u de TV op stand-by wilt zetten, drukt u op  op de TV.

In de stand-bystand blijft de TV aangesloten op de netspanning, maar is het energieverbruik heel laag.

Om de TV volledig uit te schakelen, haalt u de stekker uit het stopcontact.

Wanneer u de stekker uit het stopcontact haalt, dient u altijd aan de stekker zelf te trekken en niet aan het snoer. Zorg dat u altijd gemakkelijk bij de stekker, het netsnoer en het stopcontact kunt.

Gebruik de voedingsadapter die bij uw TV is geleverd.

Apparaten aansluiten

Apparaten aansluiten

Connectiviteitsgids

Sluit apparaten altijd aan op de TV met de kwalitatief beste aansluiting. Gebruik kabels van goede kwaliteit voor een goede overdracht van beeld en geluid.

Wanneer u een apparaat aansluit, herkent de TV het type en geeft de TV elk apparaat de juiste typenaam. U kunt de typenaam wijzigen als u dat wilt. Als voor een apparaat een juiste typenaam is ingesteld, schakelt de TV automatisch over naar de ideale TV-instellingen wanneer u in het menu Bronnen dit apparaat selecteert.

Antennepoort

Hebt u een Settopbox (een digitale ontvanger) of recorder, sluit dan de antennekabels zo aan dat het antennesignaal via de Settopbox en/of recorder naar de TV gaat. Zo kunnen via de antenne en de Settopbox eventueel extra zenders naar de recorder worden gezonden en opgenomen.

HDMI-poorten

Apparaten bedienen

Wilt u een apparaat bedienen dat is aangesloten op HDMI en is geconfigureerd met EasyLink? Selecteer het apparaat, of de activiteit ervan, in de lijst TV-aansluitingen.

Professionele modus UIT – Druk op  Home, selecteer  Apps, selecteer  BRONNEN. Kies een apparaat dat is verbonden met een HDMI-aansluiting en druk op OK.

Professionele modus AAN – Druk op  Home, selecteer  TV op TV-zenders, selecteer  Bronnen. Kies een apparaat dat is verbonden met een HDMI-aansluiting en druk op OK.

HDMI-kwaliteit

Een HDMI-aansluiting biedt de beste beeld- en geluidskwaliteit. In een HDMI-kabel worden video- en audiosignalen gecombineerd. Gebruik een HDMI-kabel voor TV-sigitaal.

Gebruik voor de beste signaaloverdracht een High Speed HDMI-kabel die niet langer is dan 5 meter.

Kopieerbeveiliging

HDMI-kabels ondersteunen HDCP (High-bandwidth Digital Content Protection). HDCP is een signaal voor kopieerbeveiliging om te voorkomen dat inhoud van een DVD of Blu-ray Disc wordt gekopieerd. Dit wordt ook wel DRM (Digital Rights Management) genoemd.

HDMI ARC

Alle HDMI-aansluitingen op de TV beschikken over HDMI ARC (Audio Return Channel).

Als het apparaat, doorgaans een home cinema-systeem (HTS), ook beschikt over de HDMI ARC-aansluiting, kunt u het aansluiten op elke willekeurige HDMI-aansluiting van deze TV. Met de HDMI ARC-aansluiting hoeft u niet de extra audiokabel aan te sluiten om het geluid van het TV-beeld via het HTS af te spelen. De HDMI ARC-aansluiting brengt zowel het beeld als het geluid over.

U kunt het home cinema-systeem (HTS) op elke HDMI-aansluiting van deze TV aansluiten, maar de ARC-aansluiting is maar voor één apparaat tegelijk beschikbaar.

HDMI CEC - EasyLink

Een HDMI-aansluiting biedt de beste beeld- en geluidskwaliteit. In een HDMI-kabel worden video- en audiosignalen gecombineerd. Gebruik een HDMI-kabel voor High Definition (HD) TV-signalen. Gebruik voor de beste signaaloverdracht een High Speed HDMI-kabel die niet langer is dan 5 meter.

Sluit HDMI CEC-compatibele apparaten aan op uw TV.

EasyLink HDMI CEC moet dan zijn ingeschakeld op de TV en het aangesloten apparaat.

Opmerking:

- EasyLink werkt mogelijk niet in combinatie met apparaten van een ander merk.
- De HDMI CEC-functie heeft verschillende namen bij verschillende merken. Enkele voorbeelden: Anynet, Aquos Link, Bravia Theatre Sync, Kuro Link, Simplink en Viera Link. Niet alle merken zijn volledig compatibel met EasyLink. De hier als voorbeeld genoemde HDMI CEC-merknamen zijn eigendom van de respectieve eigenaars.

EasyLink Aan of Uit

U kunt EasyLink aan- of uitzetten. De EasyLink-instellingen zijn op de TV standaard ingeschakeld.

EasyLink volledig uitschakelen...

Professionele modus UIT – Druk op  Home. Druk op  (omlaag), selecteer Instellingen en druk op OK.

Selecteer Bronnen > EasyLink en druk op OK .

Selecteer EasyLink en druk op OK.

Selecteer Uit en druk vervolgens op OK.

Druk zo nodig enkele malen op  BACK om het menu te sluiten.

Professionele modus AAN – Raadpleeg de installatiehandleiding.

7.2

Ontvanger - Set-top box

Met twee antennekabels sluit u de antenne aan op de set-top box (een digitale ontvanger) en de TV.

Naast de antenne-aansluitingen zit de HDMI-aansluiting voor het aansluiten van de set-top box op de TV.

7.3

Blu-ray Disc-speler

Sluit de Blu-ray Disc-speler met een High Speed HDMI-kabel aan op de TV.

Als de Blu-ray Disc-speler over EasyLink HDMI CEC beschikt.

Hoofdtelefoon

U kunt een hoofdtelefoon aansluiten op de -aansluiting aan de achterkant van de TV. Dit is een mini-aansluiting van 3,5 mm. Het volume van de hoofdtelefoon kunt u afzonderlijk aanpassen.

Gameconsole

HDMI

Voor de beste kwaliteit sluit u de gameconsole met een High Speed HDMI-kabel aan op de TV.

USB-stick

U kunt foto's bekijken of muziek- en videobestanden afspelen vanaf een aangesloten USB-stick.

Plaats terwijl de TV is ingeschakeld een USB-stick in een van de USB-aansluitingen van de TV.

De TV detecteert de USB-stick en er wordt een lijst met de inhoud ervan geopend. Als de inhoud niet automatisch wordt weergegeven...

Professionele modus UIT – Druk op  Home, selecteer  Apps, selecteer  Bronnen . Kies USB en druk op OK.

Professionele modus AAN – Druk op  Home, selecteer TV-zenders , selecteer  BRONNEN . Kies USB en druk op OK.

Als u niet meer wilt kijken of luisteren naar de inhoud die op de USB-stick staat, drukt u op  of selecteert u een andere activiteit.

Als u de USB-stick wilt loskoppelen, kunt u deze er op elk gewenst moment uit trekken.

Computer

Aansluiten

U kunt uw computer aansluiten op de TV en de TV als computerscherm gebruiken.

Met HDMI

Sluit de computer aan met een HDMI-kabel.

Ideale instelling

Als u een computer aansluit, adviseren wij u om de aansluiting, waarop de computer is aangesloten, de juiste naam voor het apparaattype te geven in het menu Bron. Als u overschakelt naar Computer in het menu Bronnen, wordt de TV automatisch ingesteld op de ideale computerinstelling.

De TV instellen op de ideale instelling...

Professionele modus UIT – Druk op  Home. Druk op  (omlaag), selecteer Instellingen en druk op OK.

Selecteer Beeld en druk op  (rechts) om naar het menu te gaan. Selecteer Beeldstijl > Computer en druk op OK.

Selecteer Aan of Uit en druk op OK.

Druk zo nodig enkele malen op ← om het menu te sluiten.

Professionele modus AAN – Druk op  Home >  Meer >  Instellingen >  Beeld. Druk op OK.

Selecteer **Beeldstijl** > **Computer** en druk op OK.

Selecteer **Aan of Uit** en druk op OK.

Druk zo nodig enkele malen op ← om het menu te sluiten.

(Raadpleeg voor meer informatie over de professionele modus de installatiehandleiding)

Uw Android-TV aansluiten

Netwerk en Internet

Thuisnetwerk

Om optimaal te kunnen profiteren van uw Philips Android-TV, moet de TV met internet verbonden zijn.

Verbind de TV met een thuisnetwerk via een snelle internetverbinding. U kunt uw TV met of zonder kabels aansluiten op uw netwerkrouter.

Verbinden met netwerk

Draadloze verbinding

Wat hebt u nodig

Als u de TV draadloos wilt aansluiten op internet, hebt u een Wi-Fi-router met een internetverbinding nodig.

Gebruik een snelle internetverbinding (breedband).

Verbinding maken

Verbinding maken - Draadloos

Druk op Home > Instellingen > Draadloos en netwerken > Verbinding maken met netwerk > Draadloos.

- 1 - Selecteer uw draadloze netwerk in de lijst met gevonden netwerken. Als uw netwerk zich niet in de lijst bevindt omdat de netwerknaam verborgen is (u hebt de SSID-broadcast van de router ingeschakeld), selecteert u Nieuw netwerk toevoegen en voert u de netwerknaam zelf in.
- 2 - Afhankelijk van uw type router kunt u nu de coderingsleutel (WEP, WPA of WPA2) invoeren. Als u de coderingsleutel voor dit netwerk al eens eerder hebt ingevoerd, selecteert u OK om direct verbinding te maken.
- 3 - Er verschijnt een bericht wanneer de verbinding tot stand is gebracht.

Verbinding maken - WPS

Druk op Home > Instellingen > Draadloos en netwerken > Verbinding maken

met netwerk > WPS.

Als uw router beschikt over WPS, kunt u direct zonder zoeken verbinding maken met die router. Als apparaten in uw draadloze netwerk gebruikmaken van het WEP-beveiligingssysteem, kunt u WPS niet gebruiken.

- 1 - Ga naar de router, druk op de knop WPS en ga binnen 2 minuten terug naar de TV.
- 2 - Selecteer Aansluiten om de verbinding tot stand te brengen.
- 3 - Er verschijnt een bericht wanneer de verbinding tot stand is gebracht.

Verbinding maken - WPS met pincode

Druk op Home > Instellingen > Draadloos en netwerken > Verbinding maken met netwerk > WPS met pincode.

Als uw router beschikt over WPS met een pincode, kunt u direct zonder zoeken verbinding maken met die router. Als apparaten in uw draadloze netwerk gebruikmaken van het WEP-beveiligingssysteem, kunt u WPS niet gebruiken.

- 1 - Noteer de 8-cijferige pincode die op het scherm wordt weergegeven, en voer die code in de routersoftware op uw PC in. In de routerhandleiding leest u waar in de routersoftware u de pincode dient op te geven.
- 2 - Selecteer Aansluiten om de verbinding tot stand te brengen.
- 3 - Er verschijnt een bericht wanneer de verbinding tot stand is gebracht.

Problemen

Draadloos netwerk wordt niet gevonden of wordt gestoord

- Magnetrons, DECT-telefoons of andere Wi-Fi 802.11b/g/n-apparaten in de buurt kunnen storing veroorzaken op het draadloze netwerk.
- Controleer of alle firewalls binnen uw netwerk draadloze verbinding met de TV toestaan.
- Als het draadloze thuisnetwerk niet goed werkt, gebruik dan een bekabelde netwerkinstallatie.

Internet werkt niet

- Als de verbinding met de router in orde is, controleert u of de router verbinding heeft met internet.

De PC en de internetverbinding zijn traag

- Raadpleeg de handleiding van uw draadloze router voor informatie over het bereik binnenshuis, de overdrachtssnelheid en andere factoren die de signaalkwaliteit kunnen beïnvloeden.
- Voor uw router is een snelle internetverbinding (breedband) aanbevolen.

DHCP

• Als er geen verbinding kan worden gemaakt, controleert u de DHCP-instelling van de router. DHCP moet zijn ingeschakeld.

Bekabelde verbinding

Wat hebt u nodig

Als u de TV wilt aansluiten op internet, hebt u een netwerkrouter met een internetverbinding nodig. Gebruik een snelle internetverbinding (breedband).

Verbinding maken

Verbinding maken - Met kabel

Druk op Home > Instellingen > Draadloos en netwerken > Verbinding maken met netwerk > Met kabel.

- 1 - Sluit de router met een netwerkkabel (Ethernet-kabel**) aan op de TV.
- 2 - Controleer of de router is ingeschakeld.
- 3 - De TV zoekt voortdurend naar de netwerkverbinding.
- 4 - Er verschijnt een bericht wanneer de verbinding tot stand is gebracht.

Als er geen verbinding kan worden gemaakt, controleert u de DHCP-instelling van de router. DHCP moet zijn ingeschakeld.

** Om te voldoen aan de EMC-regelgeving dient u een afgeschermd FTP Cat. 5E Ethernetkabel te gebruiken.

Google-account

Aanmelden

Om optimaal te profiteren van uw Philips Android-TV kunt u zich aanmelden bij Google met uw Google-account.

Door u aan te melden kunt u uw favoriete games spelen via telefoon, tablet en TV. U krijgt ook aangepaste muziek- en video-aanbevelingen op uw

TV-startpagina evenals toegang tot YouTube, Google en andere apps.

Gebruik uw bestaande **Google-account** om u aan te melden bij Google op uw TV. Een Google-account bestaat uit een e-mailadres en een wachtwoord. Als u nog geen Google-account hebt, kunt u er een maken met uw computer of tablet (accounts.google.com). Om games te spelen met Google Play hebt u een Google+-profiel nodig. Als u zich niet tijdens de eerste TV-installatie aanmeldt, kunt u zich ook later aanmelden.

Aanmelden

Druk op Home > Apps > Google Play.

Voer met het schermtoetsenbord uw e-mailadres en wachtwoord in en druk op dezelfde **OK**-toets om u aan te melden.

Android-instellingen

U kunt diverse Android-specifieke instellingen of informatie instellen of bekijken. U kunt de lijst opzoeken met geïnstalleerde apps op uw TV en zien hoeveel ruimte ze nodig hebben. U kunt instellen in welke taal u Voice Search wilt gebruiken. U kunt het toetsenbord op het scherm configureren of apps toestaan om uw locatie te gebruiken. Ontdek de verschillende Android-instellingen. Ga naar www.support.google.com/androidtv voor meer informatie over deze instellingen.

Om deze instellingen te openen...

Drukt u op Home > Instellingen > Instellingen > Android-instellingen.

Selecteer **Zender zoeken** om een zender te zoeken en druk op **OK**. U kunt zelf een frequentie invoeren om een zender te zoeken of de TV naar een zender laten zoeken. Druk op **➤** (rechts) om **Zoeken** te selecteren en druk op **OK** om automatisch naar een zender te zoeken. De gevonden zender wordt op het scherm weergegeven. Als de ontvangst slecht is, drukt u weer op **Zoeken**. Als u de zender wilt opslaan, selecteert u **Gereed** en drukt u op **OK**.

- **Opslaan**

U kunt de zender vastleggen onder het huidige zendernummer of onder een nieuw zendernummer. Selecteer **Vastleggen onder huidig zendernummer** of **Vastleggen onder nieuw zendernummer** en druk op **OK**. Het nieuwe zendernummer wordt kort weergegeven.

U kunt deze stappen opnieuw uitvoeren totdat u alle beschikbare analoge TV-zenders hebt gevonden.

Internet

Internet starten

U kunt op uw TV surfen op het internet. U kunt alle internetwebsites zien, maar de meeste zijn niet geschikt voor weergave op TV.

- Een aantal plug-ins (bijvoorbeeld om pagina's of video's te bekijken) zijn niet beschikbaar op uw TV.
- U kunt geen bestanden verzenden of downloaden.
- Internetpagina's worden per pagina weergegeven en nemen het hele scherm in beslag.

De internetbrowser starten...

- 1 - Druk op **HOME**.
- 2 - Schuif omlaag en selecteer **Apps > Internet** en druk op **OK**.
- 3 - Voer een internetadres in en selecteer **✓**, druk op **OK**.
- 4 - Druk op **HOME** of **TV** om internet te sluiten.

Software

Software bijwerken

Softwareversie

De huidige versie van de TV-software weergeven...

- 1 - Druk op **HOME**, selecteer **Instellingen** **⚙** en druk op **OK**.
- 2 - Selecteer **Software bijwerken > Huidige firmware** en druk op **OK**.
- 3 - De versie, releaseopmerkingen en aanmaakdatum worden weergegeven.
- 4 - Druk zo nodig enkele malen op **◀** (links) om het menu te sluiten.

Bijwerken vanaf website

U vindt de huidige firmwareversie van uw TV in het instellingenmenu onder **Software bijwerken > Huidige firmware**.

Kijk regelmatig op www.philips.com/support voor nieuwe firmware-updates.

Volg de onderstaande instructies om de firmware van uw TV bij te werken.

De nieuwste software downloaden...

- 1 - Start Internet Explorer.
- 2 - Ga naar de ondersteuningswebsite van Philips op <http://www.philips.com/support>.
- 3 - Voer het modelnummer in. (u vindt het modelnummer op het label aan de achterkant van de TV.)
- 4 - Selecteer **Ondersteuning** wanneer u de productpagina van uw TV invoert.
- 5 - Selecteer **Software-updates** en klik op **Bestand downloaden** om de software te downloaden. (de software is als zip-bestand beschikbaar.)
- 6 - Als de softwareversie hoger is dan de versie die op uw TV is geïnstalleerd, klik dan op de koppeling om de software te downloaden.
- 7 - Accepteer de licentieovereenkomst/voorwaarden en selecteer **Ik ga akkoord**. Het zip-bestand wordt vervolgens automatisch gedownload.
- 8 - Pak met behulp van een archiveerprogramma het zip-bestand uit in een map.
- 9 - Maak een map met de naam 'upgrades' in de hoofdmap van uw USB-stick.
- 10 - Kopieer het eerder uitgepakte upg-bestand naar de map 'upgrades', zoals hieronder wordt weergegeven.
- 11 - Haal de USB-stick uit de computer.

De software bijwerken...

- 1 - Sluit de USB-stick (met de software-update) aan op de USB-aansluiting op de TV. Wacht 30 seconden of wacht tot het USB-station door de TV wordt herkend.
- 2 - De software wordt automatisch door de TV geladen.
- 3 - Wanneer het laden van de software is voltooid, drukt u op Starten om de TV bij te werken.

GNU LIBRARY GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1991 Free Software Foundation, Inc.

51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Library General Public License, applies to some specially designated Free Software Foundation software, and to any other libraries whose authors decide to use it. You can use it for your libraries, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library, or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must

make sure that they, too, receive or can get the source code. If you link a program with the library, you must provide complete object files to the recipients so that they can relink them with the library, after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

Our method of protecting your rights has two steps: (1) copyright the library, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the library.

Also, for each distributor's protection, we want to make certain that everyone understands that there is no warranty for this free library. If the library is modified by someone else and passed on, we want its recipients to know that what they have is not the original version, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that companies distributing free software will individually obtain patent licenses, thus in effect transforming the program into proprietary software. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License, which was designed for utility programs. This license, the GNU Library General Public License, applies to certain designated libraries. This license is quite different from the ordinary one; be sure to read it in full, and don't assume that anything in it is the same as in the ordinary license.

The reason we have a separate public license for some libraries is that they blur the distinction we usually make between modifying or adding to a program and simply using it. Linking a program with a library, without changing the library, is in some sense simply using the library, and is analogous to running a utility program or application program. However, in a textual and legal sense, the linked executable is a combined work, a derivative of the original library, and the ordinary General Public License treats it as such.

Because of this blurred distinction, using the ordinary General Public License for libraries did not effectively promote software sharing, because most developers did not use the libraries. We concluded that weaker conditions might promote sharing better.

However, unrestricted linking of non-free programs would deprive the users of those programs of all benefit from the free status of the libraries themselves. This Library General Public License is intended to permit developers of non-free programs to use free libraries, while preserving your freedom as a user of such programs to change the free libraries

that are incorporated in them. (We have not seen how to achieve this as regards changes in header files, but we have achieved it as regards changes in the actual functions of the Library.) The hope is that this will lead to faster development of free libraries.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, while the latter only works together with the library.

Note that it is possible for a library to be covered by the ordinary General Public License rather than by this special one.

GNU LIBRARY GENERAL PUBLIC LICENSE

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Library General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associate interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library

does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) The modified work must itself be a software library.

b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.

c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.

d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the squareroot function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote. Thus, it is not the intent of this section to claim

rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License.

Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also compile or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

c) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

d) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you

indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the

limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Library General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

GNU LESSER GENERAL PUBLIC LICENSE

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with

modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) The modified work must itself be a software library.

b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.

c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.

d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-

defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code

from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License.

Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. ARPHIC PUBLIC LICENSE

Copyright (C) 1999 Arphic Technology Co., Ltd.

All rights reserved except as specified below.

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is forbidden.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the ARPHIC PUBLIC LICENSE specifically permits and encourages you to use this software, provided that you give the recipients all the rights that we gave you and make sure they can get the modifications of this software.

Legal Terms

Throughout this License, "Font" means the TrueType fonts "AR PL Mingti2L Big5", "AR PL KaitiM Big5" (BIG-5 character set) and "AR PL SungtiL GB", "AR PL KaitiM GB" (GB character set) which are originally distributed by Arphic, and the derivatives of those fonts created through any modification including modifying glyph, reordering glyph, converting format, changing font name, or adding/deleting some characters in/from glyph table.

"PL" means "Public License".

"Copyright Holder" means whoever is named in the copyright or copyrights for the Font.

"You" means the licensee, or person copying, redistributing or modifying the Font.

"Freely Available" means that you have the freedom to copy or modify the Font as well as redistribute copies of the Font under the same conditions you received, not price. If you wish, you can charge for this service.

You may copy and distribute verbatim copies of this Font in any medium, without restriction, provided

that you retain this license file (ARPHICPL.TXT) unaltered in all copies.

You may otherwise modify your copy of this Font in any way, including modifying glyph, reordering glyph, converting format, changing font name, or adding/deleting some characters in/from glyph table, and copy and distribute such modifications under the terms of Section 1 above, provided that the following conditions are met:

a) You must insert a prominent notice in each modified file stating how and when you changed that file.

b) You must make such modifications Freely Available as a whole to all third parties under the terms of this License, such as by offering access to copy the modifications from a designated place, or distributing the modifications on a medium customarily used for software interchange.

c) If the modified fonts normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the Font under these conditions, and telling the user how to view a copy of this License.

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Font, and can be reasonably considered independent and separate works in themselves, then this License and its terms, do not apply to those sections when you distribute them as separate works. Therefore, mere aggregation of another work not based on the Font with the Font on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

You may not copy, modify, sublicense, or distribute the Font except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Font will automatically retroactively void your rights under this License. However, parties who have received copies or rights from you under this License will keep their licenses valid so long as such parties remain in full compliance.

You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to copy, modify, sublicense or distribute the Font. These actions are prohibited by law if you do not accept this License. Therefore, by copying, modifying, sublicensing or distributing the Font, you indicate your acceptance of this License and all its terms and conditions.

Each time you redistribute the Font, the recipient

automatically receives a license from the original licensor to copy, distribute or modify the Font subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Font at all. For example, if a patent license would not permit royalty-free redistribution of the Font by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Font.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

BECAUSE THE FONT IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE FONT, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS OR OTHER PARTIES PROVIDE THE FONT "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE FONT IS WITH YOU. SHOULD THE FONT PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING, IN NO EVENT WILL ANY COPYRIGHTT HOLDERS, OR OTHER PARTIES WHO MAY COPY, MODIFY OR REDISTRIBUTE THE FONT AS PERMITTED ABOVE, BE LIABLE TO YOU FOR ANY DIRECT, INDIRECT, CONSEQUENTIAL, INCIDENTAL, SPECIAL OR EXEMPLARY DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE FONT (INCLUDING BUT NOT LIMITED TO PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA OR PROFITS; OR BUSINESS INTERRUPTION), EVEN IF SUCH HOLDERS OR OTHER PARTIES HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

Bitstream Vera Fonts Copyright

The fonts have a generous copyright, allowing derivative works (as long as "Bitstream" or "Vera" are not in the names), and full redistribution (so long as they are not *sold* by themselves). They can be bundled, redistributed and sold with any software.

The fonts are distributed under the following copyright:

Vera is a trademark of Bitstream, Inc.

Permission is hereby granted, free of charge, to any person obtaining

a copy of the fonts accompanying this license ("Fonts") and associated

documentation files (the "Font Software"), to reproduce and distribute

the Font Software, including without limitation the rights to use,

copy, merge, publish, distribute, and/or sell copies of the Font

Software, and to permit persons to whom the Font Software is furnished

to do so, subject to the following conditions:

The above copyright and trademark notices and this permission notice

shall be included in all copies of one or more of the Font Software

The Font Software may be modified, altered, or added to, and in

particular the designs of glyphs or characters in the Fonts may be

modified and additional glyphs or characters may be added to the

Fonts, only if the fonts are renamed to names not containing either

the words "Bitstream" or the word "Vera".

This License becomes null and void to the extent applicable to Fonts

or Font Software that has been modified and is distributed under the

"Bitstream Vera" names.

The Font Software may be sold as part of a larger

software package but

no copy of one or more of the Font Software typefaces may be sold by itself.

Copyright FAQ

=====

1. I don't understand the resale restriction... What gives?

Bitstream is giving away these fonts, but wishes to ensure its competitors can't just drop the fonts as is into a font sale system and sell them as is. It seems fair that if Bitstream can't make money from the Bitstream Vera fonts, their competitors should not be able to do so either. You can sell the fonts as part of

any software package, however.

2. I want to package these fonts separately for distribution and

sale as part of a larger software package or system. Can I do so?

Yes. A RPM or Debian package is a "larger software package" to begin

with, and you aren't selling them independently by themselves.

See 1. above.

3. Are derivative works allowed?

Yes!

4. Can I change or add to the font(s)?

Yes, but you must change the name(s) of the font(s).

5. Under what terms are derivative works allowed?

You must change the name(s) of the fonts. This is to ensure the

quality of the fonts, both to protect Bitstream and Gnome. We want to

ensure that if an application has opened a font specifically of these

names, it gets what it expects (though of course, using fontconfig,

substitutions could still could have occurred during font

opening). You must include the Bitstream copyright. Additional

copyrights can be added, as per copyright law. Happy Font Hacking!

6. If I have improvements for Bitstream Vera, is it possible they might get

adopted in future versions?

Yes. The contract between the Gnome Foundation and Bitstream has

provisions for working with Bitstream to ensure quality additions to

the Bitstream Vera font family. Please contact us if you have such

additions. Note, that in general, we will want such additions for the

entire family, not just a single font, and that you'll have to keep

both GNOME and Jim Lyles, Vera's designer, happy! To make sense to add

glyphs to the font, they must be stylistically in keeping with Vera's

design. Vera cannot become a "ransom note" font. Jim Lyles will be

providing a document describing the design elements used in Vera, as a

guide and aid for people interested in contributing to Vera.

7. I want to sell a software package that uses these fonts: Can I do so?

Sure. Bundle the fonts with your software and sell your software

with the fonts. That is the intent of the copyright.

8. If applications have built the names "Bitstream Vera" into them,

can I override this somehow to use fonts of my choosing?

This depends on exact details of the software. Most open source

systems and software (e.g., GNOME, KDE, etc.) are now converting to

use fontconfig (see www.fontconfig.org) to handle font configuration,

selection and substitution; it has provisions for overriding font

names and substituting alternatives. An example is provided by the

supplied local.conf file, which chooses the family Bitstream Vera for

"sans", "serif" and "monospace". Other software (e.g., the XFree86

core server) has other mechanisms for font substitution.

TERMS AND CONDITIONS FOR USE,
REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction,

and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by

the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all

other entities that control, are controlled by, or are under common

control with that entity. For the purposes of this definition,

"control" means (i) the power, direct or indirect, to cause the

direction or management of such entity, whether by contract or

otherwise, or (ii) ownership of fifty percent (50%) or more of the

outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity

exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications,

including but not limited to software source code, documentation

source, and configuration files.

"Object" form shall mean any form resulting from mechanical

transformation or translation of a Source form, including but

not limited to compiled object code, generated documentation,

and conversions to other media types.

"Work" shall mean the work of authorship,

whether in Source or

Object form, made available under the License, as indicated by a

copyright notice that is included in or attached to the work

(an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object

form, that is based on (or derived from) the Work and for which the

editorial revisions, annotations, elaborations, or other modifications

represent, as a whole, an original work of authorship. For the purposes

of this License, Derivative Works shall not include works that remain

separable from, or merely link (or bind by name) to the interfaces of,

the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including

the original version of the Work and any modifications or additions

to that Work or Derivative Works thereof, that is intentionally

submitted to Licensor for inclusion in the Work by the copyright owner

or by an individual or Legal Entity authorized to submit on behalf of

the copyright owner. For the purposes of this definition, "submitted"

means any form of electronic, verbal, or written communication sent

to the Licensor or its representatives, including but not limited to

communication on electronic mailing lists, source code control systems,

and issue tracking systems that are managed by, or on behalf of, the

Licensor for the purpose of discussing and improving the Work, but

excluding communication that is conspicuously marked or otherwise

designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity

on behalf of whom a Contribution has been received by Licensor and

subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of

this License, each Contributor hereby grants to You a perpetual,

worldwide, non-exclusive, no-charge, royalty-free, irrevocable

copyright license to reproduce, prepare Derivative Works of,

publicly display, publicly perform, sublicense, and distribute the

Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of

this License, each Contributor hereby grants to You a perpetual,

worldwide, non-exclusive, no-charge, royalty-free, irrevocable

(except as stated in this section) patent license to make, have made,

use, offer to sell, sell, import, and otherwise transfer the Work,

where such license applies only to those patent claims licensable

by such Contributor that are necessarily infringed by their

Contribution(s) alone or by combination of their Contribution(s)

with the Work to which such Contribution(s) was submitted. If You

institute patent litigation against any entity (including a

cross-claim or counterclaim in a lawsuit) alleging that the Work

or a Contribution incorporated within the Work constitutes direct

or contributory patent infringement, then any patent licenses

granted to You under this License for that Work shall terminate

as of the date such litigation is filed.

4. Redistribution. You may reproduce and

distribute copies of the

Work or Derivative Works thereof in any medium, with or without

modifications, and in Source or Object form, provided that You

meet the following conditions:

(a) You must give any other recipients of the Work or

Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices

stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works

that You distribute, all copyright, patent, trademark, and

attribution notices from the Source form of the Work,

excluding those notices that do not pertain to any part of

the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its

distribution, then any Derivative Works that You distribute must

include a readable copy of the attribution notices contained

within such NOTICE file, excluding those notices that do not

pertain to any part of the Derivative Works, in at least one

of the following places: within a NOTICE text file distributed

as part of the Derivative Works; within the Source form or

documentation, if provided along with the Derivative Works; or,

within a display generated by the Derivative Works, if and

wherever such third-party notices normally appear. The contents

of the NOTICE file are for informational purposes only and

do not modify the License. You may add Your own attribution

notices within Derivative Works that You

distribute, alongside

or as an addendum to the NOTICE text from the Work, provided

that such additional attribution notices cannot be construed

as modifying the License.

You may add Your own copyright statement to Your modifications and

may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or

for any such Derivative Works as a whole, provided Your use,

reproduction, and distribution of the Work otherwise complies with

the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise,

any Contribution intentionally submitted for inclusion in the Work

by You to the Licensor shall be under the terms and conditions of

this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify

the terms of any separate license agreement you may have executed

with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade

names, trademarks, service marks, or product names of the Licensor,

except as required for reasonable and customary use in describing the

origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or

agreed to in writing, Licensor provides the Work (and each

Contributor provides its Contributions) on an "AS IS" BASIS,

WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or

implied, including, without limitation, any warranties or conditions

of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A

PARTICULAR PURPOSE. You are solely responsible for determining the

appropriateness of using or redistributing the Work and assume any

risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory,

whether in tort (including negligence), contract, or otherwise,

unless required by applicable law (such as deliberate and grossly

negligent acts) or agreed to in writing, shall any Contributor be

liable to You for damages, including any direct, indirect, special,

incidental, or consequential damages of any character arising as a

result of this License or out of the use or inability to use the

Work (including but not limited to damages for loss of goodwill,

work stoppage, computer failure or malfunction, or any and all

other commercial damages or losses), even if such Contributor

has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing

the Work or Derivative Works thereof, You may choose to offer,

and charge a fee for, acceptance of support, warranty, indemnity,

or other liability obligations and/or rights consistent with this

License. However, in accepting such obligations, You may act only

on Your own behalf and on Your sole responsibility, not on behalf

of any other Contributor, and only if You agree to indemnify,

defend, and hold each Contributor harmless for any liability

incurred by, or claims asserted against, such Contributor by reason

of your accepting any such warranty or additional liability.

SIL OPEN FONT LICENSE Version 1.1 – 26 February 2007

PREAMBLE

The goals of the Open Font License (OFL) are to stimulate worldwide development of collaborative font projects, to support the font creation efforts of academic and linguistic communities, and to provide a free and open framework in which fonts may be shared and improved in partnership with others.

The OFL allows the licensed fonts to be used, studied, modified and redistributed freely as long as they are not sold by themselves. The fonts, including any derivative works, can be bundled, embedded, redistributed and/or sold with any software provided that any reserved names are not used by derivative works. The fonts and derivatives, however, cannot be released under any other type of license. The requirement for fonts to remain under this license does not apply to any document created using the fonts or their derivatives.

DEFINITIONS

"Font Software" refers to the set of files released by the Copyright Holder(s) under this license and clearly marked as such. This may include source files, build scripts and documentation.

"Reserved Font Name" refers to any names specified as such after the copyright statement(s).

"Original Version" refers to the collection of Font Software components as distributed by the Copyright Holder(s).

"Modified Version" refers to any derivative made by adding to, deleting, or substituting -- in part or in whole -- any of the components of the Original Version, by changing formats or by porting the Font Software to a new environment.

"Author" refers to any designer, engineer, programmer, technical writer or other person who contributed to the Font Software.

PERMISSION & CONDITIONS

Permission is hereby granted, free of charge, to any person obtaining

a copy of the Font Software, to use, study, copy, merge, embed, modify,

redistribute, and sell modified and unmodified copies of the Font

Software, subject to the following conditions:

1) Neither the Font Software nor any of its individual components, in Original or Modified Versions, may be sold by itself.

2) Original or Modified Versions of the Font Software may be bundled, redistributed and/or sold with any software, provided that each copy

contains the above copyright notice and this license. These can be

included either as stand-alone text files, human-readable headers or

in the appropriate machine-readable metadata fields within text or

binary files as long as those fields can be easily viewed by the user.

3) No Modified Version of the Font Software may use the Reserved Font

Name(s) unless explicit written permission is granted by the corresponding

Copyright Holder. This restriction only applies to the primary font name as

presented to the users.

4) The name(s) of the Copyright Holder(s) or the Author(s) of the Font

Software shall not be used to promote, endorse or advertise any

Modified Version, except to acknowledge the contribution(s) of the

Copyright Holder(s) and the Author(s) or with their explicit written

5) The Font Software, modified or unmodified, in part or in whole,

must be distributed entirely under this license, and must not be

distributed under any other license. The requirement for fonts to

remain under this license does not apply to any document created

using the Font Software.

TERMINATION

This license becomes null and void if any of the above conditions are

not met.

If you link the application to a modified version of Mini-XML, then the changes to Mini-XML must be provided under the terms of the LGPL2 in sections 1, 2, and 4.

GNU LIBRARY GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1991 Free Software Foundation, Inc.

59 Temple Place - Suite 330, Boston, MA 02111-1307,
USA

Everyone is permitted to copy and distribute verbatim

copies of this license document, but changing it is not allowed.

[This is the first released version of the library GPL. It is numbered 2 because it goes with version 2 of the ordinary GPL.]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Library General Public License, applies to some specially designated Free Software Foundation software, and to any other libraries whose authors decide to use it. You can use it for your libraries, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library, or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link a program with the library, you must provide complete object files to the recipients so that they can relink them with the library, after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

Our method of protecting your rights has two steps: (1) copyright the library, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the library.

Also, for each distributor's protection, we want to make certain that everyone understands that there is no warranty for this free library. If the library is modified by someone else and passed on, we want its recipients to know that what they have is not the original version, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that

companies distributing free software will individually obtain patent licenses, thus in effect transforming the program into proprietary software. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License, which was designed for utility programs. This license, the GNU Library General Public License, applies to certain designated libraries. This license is quite different from the ordinary one; be sure to read it in full, and don't assume that anything in it is the same as in the ordinary license.

The reason we have a separate public license for some libraries is that they blur the distinction we usually make between modifying or adding to a program and simply using it. Linking a program with a library, without changing the library, is in some sense simply using the library, and is analogous to running a utility program or application program. However, in a textual and legal sense, the linked executable is a combined work, a derivative of the original library, and the ordinary General Public License treats it as such.

Because of this blurred distinction, using the ordinary General Public License for libraries did not effectively promote software sharing, because most developers did not use the libraries. We concluded that weaker conditions might promote sharing better.

However, unrestricted linking of non-free programs would deprive the users of those programs of all benefit from the free status of the libraries themselves. This Library General Public License is intended to permit developers of non-free programs to use free libraries, while preserving your freedom as a user of such programs to change the free libraries that are incorporated in them. (We have not seen how to achieve this as regards changes in header files, but we have achieved it as regards changes in the actual functions of the Library.) The hope is that this will lead to faster development of free libraries.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, while the latter only works together with the library.

Note that it is possible for a library to be covered by the ordinary General Public License rather than by this special one.

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those

functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
- d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in

themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under

the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a. above, for a charge no more than the cost of performing this distribution.

c) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

d) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be

distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

one line to give the library's name and an idea of what it does.

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

You must give any other recipients of the Work or Derivative Works a copy of this License; and

You must cause any modified files to carry prominent notices stating that You changed the files; and

You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Time Zone Database

ICU uses the public domain data and code derived from Time Zone Database

for its time zone support. The ownership of the TZ database is explained

in BCP 175: Procedure for Maintaining the Time Zone Database section 7.

1 - Database Ownership

The TZ database itself is not an IETF Contribution or an IETF

document. Rather it is a pre-existing and regularly updated work

that is in the public domain, and is intended to remain in the public

domain. Therefore, BCPs 78 [RFC5378] and 79 [RFC3979] do not apply

to the TZ Database or contributions that individuals make to it.

Should any claims be made and substantiated against the TZ Database,

the organization that is providing the IANA Considerations defined in

this RFC, under the memorandum of understanding with the IETF,

currently ICANN, may act in accordance with all competent court

orders. No ownership claims will be made by ICANN or the IETF Trust

on the database or the code. Any person making a contribution to the

database or code waives all rights to future claims in that

contribution or in the TZ Database.

by the usual distribution terms of the Free Software

Foundation; principally,

that you must include source code if you redistribute it. (See the file ansi2knr.c for

full details.)

However, since ansi2knr.c is not needed as part

of any program generated from the IJG code, this does not limit you more than

the foregoing paragraphs do.

The Unix configuration script "configure" was produced with GNU Autoconf.

It is copyright by the Free Software Foundation but is freely distributable.

The same holds for its supporting scripts (config.guess, config.sub,

ltconfig, ltmain.sh). Another support script, install-sh, is copyright

by M.I.T. but is also freely distributable.

It appears that the arithmetic coding option of the JPEG spec is covered by

patents owned by IBM, AT&T, and Mitsubishi. Hence arithmetic coding cannot

legally be used without obtaining one or more licenses. For this reason,

support for arithmetic coding has been removed from the free JPEG software.

(Since arithmetic coding provides only a marginal gain over the unpatented

Huffman mode, it is unlikely that very many implementations will support it.)

So far as we are aware, there are no patent restrictions on the remaining

The IJG distribution formerly included code to read and write GIF files.

To avoid entanglement with the Unisys LZW patent, GIF reading support has

been removed altogether, and the GIF writer has been simplified to produce

"uncompressed GIFs". This technique does not use the LZW algorithm; the

resulting GIF files are larger than usual, but are readable by all standard

GIF decoders.

We are required to state that

"The Graphics Interchange Format(c) is the Copyright property of

CompuServe Incorporated. GIF(sm) is a Service Mark property of

CompuServe Incorporated."

Unlimited Commercial Use

We try to make it clear that you may use all clipart from Openclipart even for unlimited commercial use. We believe that giving away our images is a great way to share with the world our talents and that will come back around in a better form.

May I Use Openclipart for?

We put together a small chart of as many possibilities and questions we have heard from people asking how they may use Openclipart. If you have an additional question, please email love@openclipart.org.

All Clipart are Released into the Public Domain.

Each artist at Openclipart releases all rights to the images they share at Openclipart. The reason is so that there is no friction in using and sharing images authors make available at this website so that each artist might also receive the same benefit in using other artists clipart totally for any possible reason.

; This is a header file for the x264ASM assembly
language, which uses
; NASM/YASM syntax combined with a large number
of macros to provide easy
; abstraction between different calling conventions
(x86_32, win64, linux64).
; It also has various other useful features to simplify
writing the kind of
; DSP functions that are most often used in x264.

; Unlike the rest of x264, this file is available under an
ISC license, as it
; has significant usefulness outside of x264 and we
want it to be available
; to the largest audience possible. Of course, if you
modify it for your own
; purposes to add a new feature, we strongly
encourage contributing a patch
; as this feature might be useful for others as well.
Send patches or ideas
; to x264-devel@videolan.org .

The FreeType Project
LICENSE

2006-Jan-27

Copyright 1996-2002,
2006 by

David Turner, Robert Wilhelm, and
Werner Lemberg

Introduction

=====

The FreeType Project is distributed in several archive packages;

some of them may contain, in addition to the FreeType font engine,

various tools and contributions which rely on, or relate to, the

FreeType Project.

This license applies to all files found in such packages, and

which do not fall under their own explicit license. The license

affects thus the FreeType font engine, the test programs,

documentation and makefiles, at the very least.

This license was inspired by the BSD, Artistic, and IJG

(Independent JPEG Group) licenses, which all encourage inclusion

and use of free software in commercial and freeware products

alike. As a consequence, its main points are that:

o We don't promise that this software works. However, we will be

interested in any kind of bug reports. ('as is' distribution)

o You can use this software for whatever you want, in parts or

full form, without having to pay us. ('royalty-free' usage)

o You may not pretend that you wrote this software. If you use

it, or only parts of it, in a program, you must acknowledge

somewhere in your documentation that you have used the

FreeType code. ('credits')

We specifically permit and encourage the inclusion of this

software, with or without modifications, in commercial products.

We disclaim all warranties covering The FreeType Project and

assume no liability related to The FreeType Project.

Finally, many people asked us for a preferred form for a

credit/disclaimer to use in compliance with this license. We thus

encourage you to use the following text:

""

Portions of this software are copyright <year> The FreeType

Project (www.freetype.org). All rights reserved.

""

Please replace <year> with the value from the FreeType version you

actually use.

Legal Terms

=====

Throughout this license, the terms 'package', 'FreeType Project',

and 'FreeType archive' refer to the set of files originally

distributed by the authors (David Turner, Robert Wilhelm, and

Werner Lemberg) as the 'FreeType Project', be they named as alpha,

beta or final release.

'You' refers to the licensee, or person using the project, where

'using' is a generic term including compiling the project's source

code as well as linking it to form a 'program' or 'executable'.

This program is referred to as 'a program using the FreeType

engine'.

This license applies to all files distributed in the original

FreeType Project, including all source code, binaries and

documentation, unless otherwise stated in the file in its

original, unmodified form as distributed in the original archive.

If you are unsure whether or not a particular file is covered by

this license, you must contact us to verify this.

The FreeType Project is copyright (C) 1996-2000 by David Turner,

Robert Wilhelm, and Werner Lemberg. All rights reserved except as

specified below.

THE FREETYPE PROJECT IS PROVIDED 'AS IS' WITHOUT WARRANTY OF ANY

KIND, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO,

WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR

PURPOSE. IN NO EVENT WILL ANY OF THE AUTHORS OR COPYRIGHT HOLDERS

BE LIABLE FOR ANY DAMAGES CAUSED BY THE USE OR THE INABILITY TO

USE, OF THE FREETYPE PROJECT.

This license grants a worldwide, royalty-free, perpetual and irrevocable right and license to use, execute, perform, compile, display, copy, create derivative works of, distribute and sublicense the FreeType Project (in both source and object code forms) and derivative works thereof for any purpose; and to authorize others to exercise some or all of the rights granted herein, subject to the following conditions:

- o Redistribution of source code must retain this license file ('FTL.TXT') unaltered; any additions, deletions or changes to the original files must be clearly indicated in accompanying documentation. The copyright notices of the unaltered, original files must be preserved in all copies of source files.

- o Redistribution in binary form must provide a disclaimer that states that the software is based in part of the work of the FreeType Team, in the distribution documentation. We also encourage you to put an URL to the FreeType web page in your documentation, though this isn't mandatory.

These conditions apply to any software derived from or based on the FreeType Project, not just the unmodified files. If you use our work, you must acknowledge us. However, no fee need be paid to us.

Neither the FreeType authors and contributors nor you shall use the name of the other for commercial, advertising, or promotional purposes without specific prior written permission.

We suggest, but do not require, that you use one or more of the

following phrases to refer to this software in your documentation

or advertising materials: 'FreeType Project', 'FreeType Engine', 'FreeType library', or 'FreeType Distribution'.

As you have not signed this license, you are not required to

accept it. However, as the FreeType Project is copyrighted

material, only this license, or another one contracted with the

authors, grants you the right to use, distribute, and modify it.

Therefore, by using, distributing, or modifying the FreeType

Project, you indicate that you understand and accept all the terms

of this license.

There are two mailing lists related to FreeType:

- o freetype@nongnu.org

Discusses general use and applications of FreeType, as well as

future and wanted additions to the library and distribution.

If you are looking for support, start in this list if you

haven't found anything to help you in the documentation.

- o freetype-devel@nongnu.org

Discusses bugs, as well as engine

internals, design issues,
specific licenses, porting, etc.

MOZILLA PUBLIC

Version 1.1

1.0.1. "Commercial Use" means distribution or otherwise making the

Covered Code available to a third party.

1.1. "Contributor" means each entity that creates or contributes to

the creation of Modifications.

1.2. "Contributor Version" means the combination of the Original

Code, prior Modifications used by a Contributor, and the Modifications

made by that particular Contributor.

1.3. "Covered Code" means the Original Code or Modifications or the

combination of the Original Code and Modifications, in each case

including portions thereof.

1.4. "Electronic Distribution Mechanism" means a mechanism generally

accepted in the software development community for the electronic

transfer of data.

1.5. "Executable" means Covered Code in any form other than Source

Code.

1.6. "Initial Developer" means the individual or entity identified

as the Initial Developer in the Source Code notice required by Exhibit

A.

1.7. "Larger Work" means a work which combines Covered Code or

portions thereof with code not governed by the terms of this License.

1.8. "License" means this document.

1.8.1. "Licensable" means having the right to grant, to the maximum

extent possible, whether at the time of the initial grant or

subsequently acquired, any and all of the rights conveyed herein.

1.9. "Modifications" means any addition to or deletion from the

substance or structure of either the Original Code or any previous

Modifications. When Covered Code is released as a series of files, a

Modification is:

A. Any addition to or deletion from the contents of a file

containing Original Code or previous Modifications.

B. Any new file that contains any part of the Original Code or

previous Modifications.

1.10. "Original Code" means Source Code of computer software code

which is described in the Source Code notice required by Exhibit A as

Original Code, and which, at the time of its release under this

License is not already Covered Code governed

by this License.

1.10.1. "Patent Claims" means any patent claim(s), now owned or

hereafter acquired, including without limitation, method, process,

and apparatus claims, in any patent Licensable by grantor.

1.11. "Source Code" means the preferred form of the Covered Code for

making modifications to it, including all modules it contains, plus

any associated interface definition files, scripts used to control

compilation and installation of an Executable, or source code

differential comparisons against either the Original Code or another

well known, available Covered Code of the Contributor's choice. The

Source Code can be in a compressed or archival form, provided the

appropriate decompression or de-archiving software is widely available

for no charge.

1.12. "You" (or "Your") means an individual or a legal entity

exercising rights under, and complying with all of the terms of, this

License or a future version of this License issued under Section 6.1.

For legal entities, "You" includes any entity which controls, is

controlled by, or is under common control with You. For purposes of

this definition, "control" means (a) the power, direct or indirect,

to cause the direction or management of such entity, whether by

contract or otherwise, or (b) ownership of more than fifty percent

(50%) of the outstanding shares or beneficial ownership of such

entity.

2.1. The Initial Developer Grant.

The Initial Developer hereby grants You a world-wide, royalty-free,

non-exclusive license, subject to third party intellectual property

claims:

(a) under intellectual property rights (other than patent or

trademark) Licensable by Initial Developer to use, reproduce,

modify, display, perform, sublicense and distribute the Original

Code (or portions thereof) with or without Modifications, and/or

as part of a Larger Work; and

(b) under Patents Claims infringed by the making, using or

selling of Original Code, to make, have made, use, practice,

sell, and offer for sale, and/or otherwise dispose of the

Original Code (or portions thereof).

(c) the licenses granted in this Section 2.1(a) and (b) are

effective on the date Initial Developer first distributes

Original Code under the terms of this License.

(d) Notwithstanding Section 2.1(b) above, no patent license is

granted: 1) for code that You delete from the Original Code; 2)

separate from the Original Code; or 3) for infringements caused

by: i) the modification of the Original Code or ii) the

combination of the Original Code with other software or devices.

2.2. Contributor Grant.

Subject to third party intellectual property claims, each Contributor

hereby grants You a world-wide, royalty-free, non-exclusive license

(a) under intellectual property rights (other than patent or trademark) Licensable by Contributor, to use, reproduce, modify, display, perform, sublicense and distribute the Modifications created by such Contributor (or portions thereof) either on an unmodified basis, with other Modifications, as Covered Code and/or as part of a Larger Work; and

(b) under Patent Claims infringed by the making, using, or selling of Modifications made by that Contributor either alone and/or in combination with its Contributor Version (or portions of such combination), to make, use, sell, offer for sale, have made, and/or otherwise dispose of: 1) Modifications made by that Contributor (or portions thereof); and 2) the combination of Modifications made by that Contributor with its Contributor Version (or portions of such combination).

(c) the licenses granted in Sections 2.2(a) and 2.2(b) are effective on the date Contributor first makes Commercial Use of the Covered Code.

(d) Notwithstanding Section 2.2(b) above, no patent license is granted: 1) for any code that Contributor has deleted from the Contributor Version; 2) separate from the Contributor Version; 3) for infringements caused by: i) third party modifications of Contributor Version or ii) the combination of Modifications made by that Contributor with other software (except as part of the Contributor Version) or other devices; or

4) under Patent Claims

infringed by Covered Code in the absence of Modifications made by that Contributor.

3.1. Application of License.

The Modifications which You create or to which You contribute are

governed by the terms of this License, including without limitation

Section 2.2. The Source Code version of Covered Code may be

distributed only under the terms of this License or a future version

of this License released under Section 6.1, and You must include a

copy of this License with every copy of the Source Code You

distribute. You may not offer or impose any terms on any Source Code

version that alters or restricts the applicable version of this

License or the recipients' rights hereunder. However, You may include

an additional document offering the additional rights described in

Section 3.5.

3.2. Availability of Source Code.

Any Modification which You create or to which You contribute must be

made available in Source Code form under the terms of this License

either on the same media as an Executable version or via an accepted

Electronic Distribution Mechanism to anyone to whom you made an

Executable version available; and if made available via Electronic

Distribution Mechanism, must remain available for at least twelve (12)

months after the date it initially became available, or at least six

(6) months after a subsequent version of that particular Modification

has been made available to such recipients. You are responsible for

ensuring that the Source Code version remains

available even if the

Electronic Distribution Mechanism is maintained by a third party.

3.3. Description of Modifications.

You must cause all Covered Code to which You contribute to contain a

file documenting the changes You made to create that Covered Code and

the date of any change. You must include a prominent statement that

the Modification is derived, directly or indirectly, from Original

Code provided by the Initial Developer and including the name of the

Initial Developer in (a) the Source Code, and (b) in any notice in an

Executable version or related documentation in which You describe the

origin or ownership of the Covered Code.

3.4. Intellectual Property Matters

(a) Third Party Claims.

If Contributor has knowledge that a license under a third party's

intellectual property rights is required to exercise the rights

granted by such Contributor under Sections 2.1 or 2.2,

Contributor must include a text file with the Source Code

distribution titled "LEGAL" which describes the claim and the

party making the claim in sufficient detail that a recipient will

know whom to contact. If Contributor obtains such knowledge after

the Modification is made available as described in Section 3.2,

Contributor shall promptly modify the LEGAL file in all copies

Contributor makes available thereafter and shall take other steps

(such as notifying appropriate mailing lists or newsgroups)

reasonably calculated to inform those who received the Covered

Code that new knowledge has been

obtained.

(b) Contributor APIs.

If Contributor's Modifications include an application programming

interface and Contributor has knowledge of patent licenses which

are reasonably necessary to implement that API, Contributor must

also include this information in the LEGAL file.

(c) Representations.

Contributor represents that, except as disclosed pursuant to

Section 3.4(a) above, Contributor believes that Contributor's

Modifications are Contributor's original creation(s) and/or

Contributor has sufficient rights to grant the rights conveyed by

this License.

3.5. Required Notices.

You must duplicate the notice in Exhibit A in each file of the Source

Code. If it is not possible to put such notice in a particular Source

Code file due to its structure, then You must include such notice in a

location (such as a relevant directory) where a user would be likely

to look for such a notice. If You created one or more Modification(s)

You may add your name as a Contributor to the notice described in

Exhibit A. You must also duplicate this License in any documentation

for the Source Code where You describe recipients' rights or ownership

rights relating to Covered Code. You may choose to offer, and to

charge a fee for, warranty, support, indemnity or liability

obligations to one or more recipients of Covered Code. However, You

may do so only on Your own behalf, and not on behalf of the Initial

Developer or any Contributor. You must make it absolutely clear than

any such warranty, support, indemnity or liability obligation is

offered by You alone, and You hereby agree to indemnify the Initial

Developer and every Contributor for any liability incurred by the

Initial Developer or such Contributor as a result of warranty,

support, indemnity or liability terms You offer.

3.6. Distribution of Executable Versions.

You may distribute Covered Code in Executable form only if the

requirements of Section 3.1-3.5 have been met for that Covered Code,

and if You include a notice stating that the Source Code version of

the Covered Code is available under the terms of this License,

including a description of how and where You have fulfilled the

obligations of Section 3.2. The notice must be conspicuously included

in any notice in an Executable version, related documentation or

collateral in which You describe recipients' rights relating to the

Covered Code. You may distribute the Executable version of Covered

Code or ownership rights under a license of Your choice, which may

contain terms different from this License, provided that You are in

compliance with the terms of this License and that the license for the

Executable version does not attempt to limit or alter the recipient's

rights in the Source Code version from the rights set forth in this

License. If You distribute the Executable version under a different

license You must make it absolutely clear that any terms which differ

from this License are offered by You alone, not by the Initial

Developer or any Contributor. You hereby agree

to indemnify the

Initial Developer and every Contributor for any liability incurred by

the Initial Developer or such Contributor as a result of any such

terms You offer.

3.7. Larger Works.

You may create a Larger Work by combining Covered Code with other code

not governed by the terms of this License and distribute the Larger

Work as a single product. In such a case, You must make sure the

requirements of this License are fulfilled for the Covered Code.

If it is impossible for You to comply with any of the terms of this

License with respect to some or all of the Covered Code due to

statute, judicial order, or regulation then You must: (a) comply with

the terms of this License to the maximum extent possible; and (b)

describe the limitations and the code they affect. Such description

must be included in the LEGAL file described in Section 3.4 and must

be included with all distributions of the Source Code. Except to the

extent prohibited by statute or regulation, such description must be

sufficiently detailed for a recipient of ordinary skill to be able to

understand it.

This License applies to code to which the Initial Developer has

attached the notice in Exhibit A and to related Covered Code.

6.1. New Versions.

Netscape Communications Corporation ("Netscape") may publish revised

and/or new versions of the License from time to time. Each version

will be given a distinguishing version number.

6.2. Effect of New Versions.

Once Covered Code has been published under a particular version of the

License, You may always continue to use it under the terms of that

version. You may also choose to use such Covered Code under the terms

of any subsequent version of the License published by Netscape. No one

other than Netscape has the right to modify the terms applicable to

Covered Code created under this License.

6.3. Derivative Works.

If You create or use a modified version of this License (which you may

only do in order to apply it to code which is not already Covered Code

governed by this License), You must (a) rename Your license so that

the phrases "Mozilla", "MOZILLAPL", "MOZPL", "Netscape",

"MPL", "NPL" or any confusingly similar phrase do not appear in your

license (except to note that your license differs from this License)

and (b) otherwise make it clear that Your version of the license

contains terms which differ from the Mozilla Public License and

Netscape Public License. (Filling in the name of the Initial

Developer, Original Code or Contributor in the notice described in

Exhibit A shall not of themselves be deemed to be modifications of

this License.)

COVERED CODE IS PROVIDED UNDER THIS LICENSE ON AN "AS IS" BASIS,

WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING,

WITHOUT LIMITATION, WARRANTIES THAT THE COVERED CODE IS FREE OF

DEFECTS, MERCHANTABILITY, FIT FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT.

THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE COVERED CODE

IS WITH YOU. SHOULD ANY COVERED CODE PROVE DEFECTIVE IN ANY RESPECT,

YOU (NOT THE INITIAL DEVELOPER OR ANY OTHER CONTRIBUTOR) ASSUME THE

COST OF ANY NECESSARY SERVICING, REPAIR OR CORRECTION. THIS DISCLAIMER

OF WARRANTY CONSTITUTES AN ESSENTIAL PART OF THIS LICENSE. NO USE OF

ANY COVERED CODE IS AUTHORIZED HEREUNDER EXCEPT UNDER THIS DISCLAIMER.

8.1. This License and the rights granted hereunder will terminate

automatically if You fail to comply with terms herein and fail to cure

such breach within 30 days of becoming aware of the breach. All

sublicenses to the Covered Code which are properly granted shall

survive any termination of this License. Provisions which, by their

nature, must remain in effect beyond the termination of this License

shall survive.

8.2. If You initiate litigation by asserting a patent infringement

claim (excluding declaratory judgment actions) against Initial Developer

or a Contributor (the Initial Developer or Contributor against whom

You file such action is referred to as "Participant") alleging that:

(a) such Participant's Contributor Version directly or indirectly

infringes any patent, then any and all rights granted by such

Participant to You under Sections 2.1 and/or 2.2 of this License

shall, upon 60 days notice from Participant terminate prospectively,

unless if within 60 days after receipt of notice You either: (i)

agree in writing to pay Participant a mutually agreeable reasonable

royalty for Your past and future use of Modifications made by such

Participant, or (ii) withdraw Your litigation claim with respect to

the Contributor Version against such Participant. If within 60 days

of notice, a reasonable royalty and payment arrangement are not

mutually agreed upon in writing by the parties or the litigation claim

is not withdrawn, the rights granted by Participant to You under

Sections 2.1 and/or 2.2 automatically terminate at the expiration of

the 60 day notice period specified above.

(b) any software, hardware, or device, other than such Participant's

Contributor Version, directly or indirectly infringes any patent, then

any rights granted to You by such Participant under Sections 2.1(b)

and 2.2(b) are revoked effective as of the date You first made, used,

sold, distributed, or had made, Modifications made by that

Participant.

8.3. If You assert a patent infringement claim against Participant

alleging that such Participant's Contributor Version directly or

indirectly infringes any patent where such claim is resolved (such as

by license or settlement) prior to the initiation of patent

infringement litigation, then the reasonable value of the licenses

granted by such Participant under Sections 2.1 or 2.2 shall be taken

into account in determining the amount or value of any payment or

license.

8.4. In the event of termination under Sections 8.1 or 8.2 above,

all end user license agreements (excluding distributors and resellers)

which have been validly granted by You or any distributor hereunder

prior to termination shall survive termination.

UNDER NO CIRCUMSTANCES AND UNDER NO LEGAL THEORY, WHETHER TORT

(INCLUDING NEGLIGENCE), CONTRACT, OR OTHERWISE, SHALL YOU, THE INITIAL

DEVELOPER, ANY OTHER CONTRIBUTOR, OR ANY DISTRIBUTOR OF COVERED CODE,

OR ANY SUPPLIER OF ANY OF SUCH PARTIES, BE LIABLE TO ANY PERSON FOR

ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES OF ANY

CHARACTER INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOSS OF GOODWILL,

WORK STOPPAGE, COMPUTER FAILURE OR MALFUNCTION, OR ANY AND ALL OTHER

COMMERCIAL DAMAGES OR LOSSES, EVEN IF SUCH PARTY SHALL HAVE BEEN

INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. THIS LIMITATION OF

LIABILITY SHALL NOT APPLY TO LIABILITY FOR DEATH OR PERSONAL INJURY

RESULTING FROM SUCH PARTY'S NEGLIGENCE TO THE EXTENT APPLICABLE LAW

PROHIBITS SUCH LIMITATION. SOME JURISDICTIONS DO NOT ALLOW THE

EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO

THIS EXCLUSION AND LIMITATION MAY NOT APPLY TO YOU.

The Covered Code is a "commercial item," as that term is defined in

48 C.F.R. 2.101 (Oct. 1995), consisting of "commercial computer

software" and "commercial computer software documentation," as such

terms are used in 48 C.F.R. 12.212 (Sept. 1995). Consistent with 48

C.F.R. 12.212 and 48 C.F.R. 227.7202-1 through 227.7202-4 (June 1995),

all U.S. Government End Users acquire Covered Code with only those

rights set forth herein.

This License represents the complete agreement

concerning subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. This License shall be governed by California law provisions (except to the extent applicable law, if any, provides otherwise), excluding its conflict-of-law provisions.

With respect to disputes in which at least one party is a citizen of, or an entity chartered or registered to do business in the United States of America, any litigation relating to this License shall be subject to the jurisdiction of the Federal Courts of the Northern District of California, with venue lying in Santa Clara County, California, with the losing party responsible for costs, including without limitation, court costs and reasonable attorneys' fees and expenses. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded.

Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not apply to this License.

As between Initial Developer and the Contributors, each party is responsible for claims and damages arising, directly or indirectly, out of its utilization of rights under this License and You agree to work with Initial Developer and Contributors to distribute such responsibility on an equitable basis. Nothing herein is intended or shall be deemed to constitute any admission of liability.

Initial Developer may designate portions of the Covered Code as "Multiple-Licensed". "Multiple-Licensed" means that the Initial Developer permits you to utilize portions of the Covered Code under Your choice of the NPL or the alternative licenses, if any, specified by the Initial Developer in the file described in Exhibit A.

Help en ondersteuning

13.1

Problemen oplossen

Inschakelen

De TV gaat niet aan

- Haal het netsnoer uit het stopcontact. Wacht een minuut en sluit het snoer vervolgens weer aan.
- Controleer of het netsnoer goed is aangesloten.

Krakend geluid bij het in- of uitschakelen

Wanneer u de TV in- of uitschakelt of in stand-bystand zet, hoort u een krakend geluid vanuit de behuizing van de TV. Dit krakende geluid wordt veroorzaakt door het uitzetten en krimpen van de TV wanneer deze afkoelt en opwarmt. Dit is normaal en heeft geen invloed op de prestaties van het apparaat.

De TV schakelt opnieuw over op de stand-bystand nadat het startscherm van Philips is weergegeven

Wanneer de TV in stand-bystand staat, wordt een startscherm van Philips weergegeven. Vervolgens schakelt de TV opnieuw over op de stand-bystand. Dit is normaal. Wanneer de voeding van de TV wordt uitgeschakeld en vervolgens weer ingeschakeld, wordt het startscherm de volgende keer dat u de TV inschakelt weergegeven.

Het lampje van de stand-bystand blijft knipperen

Haal het netsnoer uit het stopcontact. Wacht 5 minuten en sluit het snoer vervolgens weer aan. Als het lampje opnieuw begint te knipperen, dient u contact op te nemen met de Philips Klantenservice.

Beeld

Geen beeld/vervormd beeld

- Controleer of de antenne goed is aangesloten op de TV.
- Controleer of het juiste apparaat is geselecteerd als weergavebron.
- Controleer of het externe apparaat of de externe bron op de juiste wijze is aangesloten.

Geluid maar geen beeld

- Controleer of de beeldinstellingen juist zijn ingesteld.

Slechte antenne-ontvangst

- Controleer of de antenne goed is aangesloten op de TV.
- Luidsprekers, ongeaarde audio-apparaten,

neonlampen, hoge gebouwen en andere grote voorwerpen kunnen de ontvangstkwaliteit beïnvloeden. Probeer de ontvangstkwaliteit indien mogelijk te verbeteren door de richting van de antenne te wijzigen of door apparaten weg van de TV te verplaatsen.

- Als de ontvangst voor slechts één zender slecht is, probeert u deze zender met Handmatige installatie, fijn af te stemmen.

Slecht beeld van een apparaat

- Controleer of het apparaat goed is aangesloten.
- Controleer of de beeldinstellingen juist zijn ingesteld.

Het beeld past niet op het scherm

Wijzig het beeldformaat.

De beeldpositie is niet juist

Beeldsignalen van sommige apparaten worden mogelijk niet juist weergegeven op het scherm. Controleer de signaaluitgang van het verbonden apparaat.

Het computerbeeld is niet stabiel

Controleer of de PC de ondersteunde resolutie en vernieuwingsfrequentie gebruikt.

Geluid

Geen geluid of matige geluidskwaliteit

Als er geen audiosignaal wordt gedetecteerd, schakelt de TV de audio-uitgang automatisch uit. Dit is geen defect.

- Controleer of de geluidsinstellingen juist zijn ingesteld.
- Controleer of alle kabels goed zijn aangesloten.
- Controleer of het volume niet is uitgeschakeld of op minimum is ingesteld.
- Controleer of de TV-audio-uitgang is aangesloten op de audio-ingang op het home cinema-systeem. Er moet geluid uit de HTS-luidsprekers komen.
- Bij sommige apparaten moet de HDMI-audio-uitgang handmatig worden ingeschakeld. Als de HDMI-audio-uitgang reeds is ingeschakeld, maar u nog altijd geen geluid hoort, kunt u proberen de digitale audio-indeling van het apparaat te wijzigen naar PCM (Pulse Code Modulation). Voor instructies raadpleegt u de documentatie die bij uw apparaat is geleverd.

Aansluitingen

HDMI

- Houd er rekening mee dat HDCP-ondersteuning (High-bandwidth Digital Content Protection) de beeldoverdracht tussen een HDMI-apparaat en een TV kan vertragen.
- Als de TV het HDMI-apparaat niet herkent en er geen beeld wordt weergegeven, probeert u de bron van het ene apparaat naar een ander over te schakelen en weer terug.
- Als het geluid steeds wordt onderbroken, controleert u of de uitganginstellingen van het HDMI-apparaat correct zijn.
- Als u een HDMI-DVI-adapter of HDMI-DVI-kabel gebruikt, controleert u of er een extra audiokabel is aangesloten op AUDIO IN (alleen mini-aansluiting), indien deze aanwezig is.

EasyLink werkt niet

- Controleer of uw HDMI-apparaten HDMI-CEC ondersteunen. EasyLink-functies werken alleen op apparaten die HDMI-CEC ondersteunen.

Er wordt geen volumepictogram weergegeven

- Dit is normaal indien er een HDMI-CEC-audioapparaat is aangesloten.

Foto's, video's en muziek van een USB-apparaat worden niet weergegeven

- Controleer of het USB-opslagapparaat MSC-compatibel is (geschikt voor massaopslag), zoals wordt beschreven in de documentatie bij het opslagapparaat.
- Controleer of het USB-opslagapparaat compatibel is met de TV.
- Controleer of de audio- en beeldbestandsindelingen worden ondersteund door de TV.

USB-bestanden worden schokkerig afgespeeld

- De overdrachtsprestaties van het USB-opslagapparaat kunnen de snelheid van de gegevensoverdracht naar de TV beperken, waardoor beeld en geluid niet goed worden weergegeven.

Wi-Fi, internet en Bluetooth

WiFi-netwerk wordt niet gevonden of wordt gestoord

- Magnetrons, DECT-telefoons of andere Wi-Fi 802.11b/g/n-apparaten in de buurt kunnen storing veroorzaken op het draadloze netwerk.
- Controleer of alle firewalls binnen uw netwerk draadloze verbinding met de TV toestaan.
- Als het draadloze thuisnetwerk niet goed werkt, gebruik dan een bekabelde netwerkinstallatie.

Internet werkt niet

- Als de verbinding met de router in orde is, controleert u of de router verbinding heeft met internet.

De PC en de internetverbinding zijn traag

- Raadpleeg de handleiding van uw draadloze router voor informatie over het bereik binnenshuis, de overdrachtssnelheid en andere factoren die de signaalkwaliteit kunnen beïnvloeden.
- Voor uw router is een snelle internetverbinding (breedband) aanbevolen.

DHCP

- Als er geen verbinding kan worden gemaakt, controleert u de DHCP-instelling van de router. DHCP moet zijn ingeschakeld.

Verbinding Bluetooth wordt verbroken

- Op plaatsen met veel draadloze activiteit (bijvoorbeeld in een appartementencomplex met veel routers) kunnen er storingen optreden in de draadloze verbinding.

Netwerk

WiFi-netwerk wordt niet gevonden of wordt gestoord

- Magnetrons, DECT-telefoons of andere Wi-Fi 802.11b/g/n-apparaten in de buurt kunnen storing veroorzaken op het draadloze netwerk.
- Controleer of alle firewalls binnen uw netwerk draadloze verbinding met de TV toestaan.
- Als het draadloze thuisnetwerk niet goed werkt, gebruik dan een bekabelde netwerkinstallatie.

Internet werkt niet

- Als de verbinding met de router in orde is, controleert u of de router verbinding heeft met internet.

De PC en de internetverbinding zijn traag

- Raadpleeg de handleiding van uw draadloze router voor informatie over het bereik binnenshuis, de overdrachtssnelheid en andere factoren die de signaalkwaliteit kunnen beïnvloeden.
- Voor uw router is een snelle internetverbinding (breedband) aanbevolen.

DHCP

- Als er geen verbinding kan worden gemaakt, controleert u de DHCP-instelling van de router. DHCP moet zijn ingeschakeld.

Onlinehulp

Als u een probleem met betrekking tot uw Philips-TV wilt oplossen, kunt u een beroep doen op onze onlineondersteuning. U kunt op de website uw taal selecteren en het modelnummer van uw product invoeren.

Ga naar www.philips.com/support

U vindt er het telefoonnummer voor uw land, alsmede antwoorden op veelgestelde vragen (FAQ's). In sommige landen kunt u chatten met een van onze medewerkers en uw vraag direct stellen, of u kunt een e-mail met uw vraag sturen.

U kunt nieuwe TV-software downloaden, of de handleiding om op uw computer te lezen.

13.3

Ondersteuning en reparatie

Voor ondersteuning en reparaties kunt u bellen met het telefoonnummer van de Philips Klantenservice in uw land. Onze monteurs zorgen voor reparatie, indien nodig.

Zoek het telefoonnummer in de gedrukte documentatie die bij de TV is meegeleverd.

Of ga naar onze

website www.philips.com/TVsupport en selecteer indien nodig uw land.

Modelnummer en serienummer

Mogelijk vraagt men u naar het modelnummer en het serienummer van de TV. Deze nummers vindt u op het verpakkingslabel of op het typelabel aan de achter- of onderzijde van de TV.

Waarschuwing

Probeer de TV niet zelf te repareren. Dit kan leiden tot ernstig letsel, onherstelbare schade aan uw TV of kan ervoor zorgen dat uw garantie vervalt.

Veiligheid en onderhoud

Veiligheid

ESD-verklaring

Er zijn knipperingen op het scherm te zien tijdens de test, maar na de test is dit automatisch hersteld. Dit toegestane verlies van prestaties wordt gespecificeerd door de fabrikant en om misverstanden te voorkomen wordt dit fenomeen in een duidelijke verklaring in de gebruikershandleiding opgenomen.

Belangrijk!

Lees alle veiligheidsinstructies goed door en zorg dat u deze begrijpt voordat u de TV gebruikt. Als er schade ontstaat doordat u instructies niet opvolgt, is de garantie niet van toepassing.

Deze apparatuur mag niet worden gewijzigd zonder toestemming van de fabrikant.

Risico op brand of een elektrische schok

- Stel de TV nooit bloot aan regen of water. Plaats objecten met water, zoals een vaas, nooit in de buurt van de TV.
- Mocht er onverhoopt vloeistof in de TV terechtkomen, dan moet u de stekker direct uit het stopcontact halen.
- Neem contact op met Philips Klantenservice om de TV te laten nakijken voordat u deze gaat gebruiken.
- Stel de TV nooit bloot aan extreme hitte. Plaats ze nooit in de buurt van brandende kaarsen, open vuur of andere hittebronnen (zoals direct zonlicht).
- Steek geen voorwerpen in de ventilatiesleuven of andere openingen van de TV.
- Plaats nooit zware voorwerpen op het netsnoer.
- Voorkom dat er kracht op de stekkers wordt uitgeoefend. Loszittende stekkers kunnen vonken of brand veroorzaken. Zorg dat het netsnoer niet strak wordt getrokken wanneer u de TV draait.
- Haal de stekker van de TV uit het stopcontact om de TV helemaal los te koppelen van netspanning. Trek het netsnoer altijd aan de stekker en nooit aan het snoer uit het stopcontact. Zorg dat u altijd gemakkelijk bij de stekker, het netsnoer en het stopcontact kunt.

Risico op letsel of schade aan de TV

- Zorg bij wandbevestiging dat de wandsteun het gewicht van de TV kan dragen en geen gevaar oplevert. TP Vision is niet aansprakelijk voor ongelukken, letsel of schade als gevolg van ondeskundige wandbevestiging.
- Dit product bevat glazen onderdelen. Ga hier voorzichtig mee om, om letsel of schade te voorkomen.

Risico op schade aan de TV!

Controleer voordat u de TV aansluit op het stopcontact, of het voltage overeenkomt met de waarde aan de achterkant van het product. Sluit de TV nooit aan op het stopcontact als het voltage afwijkt.

Letselgevaar voor kinderen

Neem de volgende voorzorgsmaatregelen in acht om te voorkomen dat de TV omvalt, waardoor kinderen letsel kunnen oplopen.

- Plaats de TV nooit op een oppervlak met een kleed of ander materiaal dat kan worden weggetrokken.
- Zorg dat geen enkel onderdeel van de TV over de rand van het oppervlak hangt.
- Plaats de TV nooit op een hoog meubelstuk (zoals een boekenkast) zonder het meubelstuk en de TV veilig aan de wand of aan een geschikte steun te bevestigen.
- Leer uw kinderen dat het gevaarlijk is op meubilair te klimmen om bij de TV te komen.

Oververhittingsgevaar

Plaats de TV nooit in een nauwe ruimte. Laat voor voldoende ventilatie aan alle zijden van de TV een afstand van minstens 10 cm vrij. Zorg dat de ventilatiesleuven van de TV nooit worden afgedekt door gordijnen of andere voorwerpen.

Onweer

Koppel de TV los van het elektriciteitsnet en de antenne als er onweer op komst is. Raak tijdens onweer geen enkel onderdeel van de TV, het netsnoer of de antennekabel aan.

Risico op gehoorbeschadiging

Zet het volume niet te hoog als u een oortelefoon of hoofdtelefoon gebruikt, en gebruik deze niet te lang.

Lage temperaturen

Als de TV is vervoerd bij een temperatuur onder 5 °C, laat u de TV na het uitpakken eerst op kamertemperatuur komen voordat u de stekker in het stopcontact steekt.

Vochtigheid

Afhankelijk van temperatuur en vochtigheid kan lichte condensvorming optreden aan de binnenkant van de glasplaat aan de voorkant van de TV (geldt voor bepaalde modellen). U kunt dit voorkomen door de TV niet bloot te stellen aan direct zonlicht, hitte of extreme vochtigheid. Als er condens ontstaat, verdwijnt deze vanzelf als de TV een aantal uren is ingeschakeld.

Het condensatievocht is niet schadelijk voor de TV en veroorzaakt geen storingen.

14.2

Schermonderhoud

- Raak het scherm nooit aan met een ander voorwerp.
- Druk op de reinigingsknop aan de achterkant van de TV. Houd deze knop 3 seconden ingedrukt om de bedieningselementen aan de voorzijde van de TV uit te schakelen voordat u de TV gaat schoonmaken.

- Reinig de TV en standaard door deze voorzichtig af te vegen met een zachte, vochtige doek. Gebruik nooit middelen zoals alcohol, chemicaliën of allesreinigers op de TV.
- Veeg waterdruppels zo snel mogelijk van het scherm om vervorming of kleurvervaging te voorkomen.
- Probeer het gebruik van stilstaande beelden zo veel mogelijk te vermijden. Stilstaande beelden zijn beelden die gedurende langere perioden op het scherm worden weergegeven. Stilstaande beelden omvatten menu's op het scherm, zwarte balken,

tijdsweergaven, enzovoort. Als u stilstaande beelden moet gebruiken, vermindert u het contrast en de helderheid van het scherm om schade aan het scherm te voorkomen.

14.3

Verklaring over blootstelling aan straling

Deze apparatuur voldoet aan de CE-limieten voor blootstelling aan straling die zijn vastgelegd voor een ongecontroleerde omgeving. Deze apparatuur moet worden geïnstalleerd en bediend met een minimale afstand van 20 cm tussen de radiator en het lichaam.

De frequentie, de modus en het maximale zendvermogen in de EU worden hieronder vermeld:

- 2400 - 2483,5 MHz: < 20 dBm (EIRP)
- 5150 - 5250 MHz: < 23 dBm (EIRP)
- 5250 - 5350 MHz: < 23 dBm (EIRP)
- 5470 - 5725 MHz: < 27 dBm (EIRP)
- 5725 - 5825 MHz: < 13,98 dBm (EIRP)

Garantievoorwaarden - Risico op verwonding, schade aan TV of vervallen van garantie!

Probeer de TV nooit zelf te repareren. Gebruik de TV en de accessoires alleen zoals de fabrikant het heeft bedoeld. Het waarschuwingsteken op de achterkant van de TV duidt het risico van een elektrische schok aan. Verwijder nooit de behuizing van de TV. Neem altijd contact op met de klantenservice van Philips voor onderhoud of reparaties. Zoek het

telefoonnummer in de gedrukte documentatie die bij de TV is meegeleverd. Of ga naar onze website www.philips.com/support en selecteer indien nodig uw land. De garantie vervalt in geval van handelingen die in deze handleiding uitdrukkelijk worden verboden of in geval van aanpassingen of montages die niet in deze handleiding worden aanbevolen of goedgekeurd.

Pixelkenmerken

Dit TV-toestel heeft een groot aantal kleurenpixels. Ondanks de minimaal 99,999% effectieve pixels, kunnen er mogelijk voortdurend zwarte puntjes of heldere lichtpuntjes (rood, groen of blauw) op het scherm verschijnen. Dit is een structureel kenmerk van het display (binnen veel voorkomende industriestandaarden); het is geen defect.

CE-conform

TP Vision Europe B.V. verklaart hierbij dat deze televisie voldoet aan de essentiële vereisten en overige relevante bepalingen van Richtlijnen 2014/53/EU (RED), 2009/125/EC (Ecologisch ontwerp) en 2011/65/EC (RoHS).

Naleving van de norm voor elektromagnetische velden (EMF)

TP Vision maakt en verkoopt vele consumentenproducten die net als andere elektronische apparaten elektromagnetische signalen kunnen uitstralen en ontvangen. Een van de belangrijkste zakelijke principes van TP Vision is ervoor te zorgen dat al onze producten beantwoorden aan alle geldende vereisten inzake gezondheid en veiligheid, en dat ze ruimschoots voldoen aan de EMF-normen die gelden ten tijde van de productie.

TP Vision streeft ernaar geen producten te ontwikkelen, te produceren en op de markt te brengen die schadelijk kunnen zijn voor de gezondheid. TP Vision bevestigt dat als zijn producten correct voor het daartoe bestemde gebruik worden aangewend, deze volgens de nieuwste wetenschappelijke onderzoeken op het moment van de publicatie van deze handleiding veilig zijn om te gebruiken. TP Vision speelt een actieve rol in de ontwikkeling van internationale EMF- en veiligheidsnormen, wat TP Vision in staat stelt in te spelen op toekomstige normen en deze tijdig te integreren in zijn producten.
