Highlights

Anti-burn technology

When there is little/no water in the tank the system will automatically prevent hot water from being dispensed, protecting the system from dry-burn

Child lock

When the output water temperature is above 45 Celsius, the child lock will be automatically activated to prevent mis-operation or scalding

Food grade material

The components which are within water are made of food grade material.

Portable design

Portable installation-free design, to provide you with fresh hot water anytime, anywhere

Multiple water temperatures

There are 4 temperatures can be selected: room temperature, 45°C, 85°C, boiled. No matter if it is baby formula, tea or coffee, now you can always prepare with ease.

Water and steam separation

With advanced water and steam separation technology, the hot steam is separated from the boiling water so that you won't get burnt when the machine is dispensing hot water.
