Measures and records your child's temperature

Accurate, fast, uGrow connected ear thermometer

The Philips Avent smart ear thermometer makes it possible to quickly and accurately take temperature readings and store them directly to your smart device using the uGrow app.

Comfortable and easy to use

- Designed for easy, comfortable in-ear measurement*

Fast and accurate

- Accurate results $\pm 0.2^{\circ}\text{C}$ / $\pm 0.4^{\circ}\text{F}$
- Gives results in Celsius and Fahrenheit
- One press and in 2 seconds you have an accurate reading
- Red LED display ring for rapid high-temperature indication

uGrow connected

- Part of the uGrow family of connected products
- Track and better understand your child's temperature
- Connects with Bluetooth® Smart to the uGrow app

Highlights

A uGrow connected product

The Philips Avent smart ear thermometer connects with our uGrow app — the world's first medical baby app with connected devices giving you personal advice that matters. Let uGrow help you discover patterns to support your little one's healthy development.

Track and record

The Philips Avent smart ear thermometer quickly and accurately takes temperature readings and establishes a body temperature history in the uGrow app to easily share with your doctor.

Fast

Keeping your child still long enough to take an accurate reading can be difficult. The Philips Avent smart ear thermometer addresses this problem by being specially designed for speed and ease. Just one press of the button and you will have a reading in 2 seconds.

Accurate

Body temperature can be measured in five locations: the mouth, the ear, the armpit, the forehead and the rectum. Our research has shown that this ear thermometer offers a medical grade measurement with $\pm 0.2^{\circ}\text{C}$ or $\pm 0.4^{\circ}\text{F}$ accuracy within the range of 32.4°C - 42.9°C (90.3°F - 109.2°F). Reflects body core temperature.*

High temperature indication

The Philips Avent smart ear thermometer has a clear LCD display so you can instantly see if the temperature reading is at normal* or raised

levels. The light ring turns red for a temperature of 38.0°C (100.4°F) and higher*. As with all cases of fever, it is important not to rely solely on the temperature measurement of the thermometer and to always seek professional medical advice without delay in the event of concerns regarding a fever or measurement.

Comfortable and easy to use

The Philips Avent smart ear thermometer takes your baby's temperature in a few simple and quick steps. Firstly, ensure the sensor is clean and dry. Then press the power button and gently pull your baby's ear backwards so the ear canal is straight. Insert the thermometer pointing the tip towards the ear drum and press the button again. Compact and streamlined, the thermometer has a probe tip that is suitable for all ages.

Celsius and Fahrenheit

No matter whether you work in Celsius or Fahrenheit, the Philips Avent smart ear thermometer will give you the results you need in the scale you understand.

uGrow connected

The Philips Avent smart ear thermometer connects with Bluetooth® Smart to your mobile device. Works with: iPhone®: Version iOS8.1 / iPhone® 5s and newer; Android™: Android™ 4.4 KitKat and above.

Specifications

Accessories

2 x AAA batteries: non-rechargeable

Power

Power source: 2 x AAA non-rechargeable batteries

Design

Colour: White

Net. Weight: About 54.6 g

Dimensions: 136(L) x 34.5(W) x 57(D) mm

Service

Two year guarantee

Ease of use

Clear LCD display

Fast: 2-second measurement

Probe tip for all ages

Switch to Celsius and Fahrenheit

Standalone device: Yes, ear thermometer can be used as a standalone device

Technical

Accuracy: $\pm 0.2^{\circ}\text{C}$ ($\pm 0.4^{\circ}\text{F}$) within the range of 32.4 – 42.9°C (90.3 – 109.2°F)

Measurement range: 32.4 – 42.9°C / 90.3 – 109.2°F

Operating environment: 10.0 – 40.0°C (50.0 – 104.0°F) with a relative humidity of 20–85%

Syncing

Data transfer: via Bluetooth® Low Energy

Phone compatibility: iPhone 5s+ | iOS 8.1+ | Android 4.4 +

* Reflects core body temperature
